Oxford Textbook of Neurocritical Care Martin Smith, Giuseppe Citerio, W. Andrew Kofke, Geert Meyfroidt, 2025-05-14 Neurocritical care is a multidisciplinary specialty that provides comprehensive management for all life threatening disorders of the central nervous system and their complications Increased understanding of the pathophysiology of acute central nervous system disorders and their impact on systemic organ systems in association with advances in neuromonitoring and neuroimaging techniques has led to the introduction of more effective and individualised treatment strategies that have translated into improved outcomes for critically ill neurological patients As well as treatments targeted to the acute neurological disorder critically ill neurological patients require meticulous general intensive care support to maintain systemic physiological stability and optimize neurological outcomes The second edition of the Oxford Textbook of Neurocritical Care brings together international experts from various disciplines to provide a comprehensive global perspective on this field In 33 updated or new chapters the book discusses the pathophysiology of acute neurological conditions advancements in monitoring and imaging techniques evidenced based treatment strategies prognostication patient outcomes and ethics Each chapter highlights advancements within specific areas and underscores the critical attention to detail that is the basis of neurocritical care practice While primarily designed for those in the neurocritical care field this textbook also serves as a valuable resource for other clinical professionals who encounter patients with acute neurological conditions in their practice It is also a useful resource for trainees from many disciplines **Anaesthesia for**

**the High Risk Patient** Ian McConachie, 2002-02 This book provides practical information on the management of high risk patients presenting for surgery as well as sufficient background information to enable an understanding of the principles and rationale behind their anaesthetic management The content reflects the needs of a broad readership and presents information not readily available in similar books e g a summary of all CEPOD reports perioperative renal failure the role of the cardiology consult and indications for admission to ICU and HDU The format of each chapter is designed to provide rapid access to important information with key facts and advice presented concisely Important references that highlight controversies within a subject and suggestions for useful further reading are also presented The book will be useful not only

as an aide memoire for the FRCA and other examinations in anaesthesia but also as a useful quick reference for all operating theatre ICU CCU and HDU based personnel

**Neuroanesthesia, An Issue of Anesthesiology Clinics** Jeffrey R. Kirsch, Cynthia A. Lien, 2021-02-08 This issue of Anesthesiology Clinics guest edited by Drs Jeffrey Kirsch and Cindy Lien focuses on Neuroanesthesia This is one of four issues each year selected by the series consulting editor Dr Lee Fleisher Articles in this issue include but are not limited to Degenerative Spine Disease Craniosynostosis Supratentorial tumors including awake craniotomies Suboccipital Procedures Acute Stroke Acute Spinal cord injury Decompressive surgery for patients with TBI Neuromonitoring and more

**Neurocritical Care** John P. Adams, Dominic Bell, Justin McKinlay, 2010-01-18 Brain injury is a worldwide leading cause of mortality and morbidity and requires early and appropriate management to minimize these adverse sequelae Despite such needs access to specialist centers is limited forcing both immediate and secondary care of these patients onto generalist staff These responsibilities are made more problematical by differences in patient management between and even within specialist centers due in part to an insufficient evidence base for many interventions directed at brain injury This book is borne out of the above observations and is targeted at emergency and acute medicine anesthetic and general intensive care staff caring for brain injury of diverse etiology or surgical teams responsible for the inpatient care of minor to moderate head trauma Although explaining the various facets of specialist care the book is not intended to compete with texts directed at neurosciences staff but aims to advise on optimal care in general hospitals including criteria for transfer by a combination of narrative on pathophysiology principles of care templates for documentation and highly specific algorithms for particular problems It is intended that the content and structure can form the basis of guidelines and protocols that reflect the needs of individual units and that can be constantly refined Our ultimate goal is to promote informed consistent auditable multidisciplinary care for this cohort of patients and we hope that this text contributes to that process

**Textbook of Onco-Anesthesiology** Rakesh Garg, Sushma Bhatnagar, 2021-05-09 This book covers all essential evidence on perioperative care and anesthetic concerns for cancer surgeries including the evaluation and assessment of patients scheduled for cancer surgeries perioperative anesthetic management of various cancers perioperative analgesia for cancer surgeries and issues related to inoperable cancers It reviews anesthetic considerations of all cancer types as there is a wide variation in anesthetic requirements in this subset of patients Cancer surgeries are on the rise worldwide and healthcare facilities with cancer as a core specialty are emerging quickly around the globe As cancer is on the rise and efficient surgical management is available more and more patients are being treated surgically However cancer surgeries are complicated have varied concerns and these are not covered sufficiently in presently available textbooks of anesthesiology This book fulfills the growing need for a complete and comprehensive textbook of onco anesthesia and fills the gap in the current texts that do not exclusively cover anesthesia for cancer surgeries This textbook serves as a comprehensive but quick guide for trainee residents fellows and practicing anesthesiologists clinicians and surgeons

*Anaesthesia for Emergency Care* Jerry Nolan, Jasmeet Soar, 2012-06-28 Oxford Specialist Handbooks in Anaesthesia offer a concise didactic way for medical and nursing staff to access practical management advice that is portable accessible and reliable *Anaesthesia for Emergency Care* provides essential information for trainees staff doctors and consultants who are expected to anaesthetize patients for emergency surgery and other life saving interventions It includes concise advice on providing anaesthesia in the operating suite and in other locations such as the emergency department radiology department and out of hospital The book supports the curriculum for the CCT in Anaesthetics and covers many items across all three levels of the Royal College of Anaesthetists CPD matrix

**Key Questions in Anesthesia, Third Edition** T.M. Craft, 2021-03-24 This second edition contains 360 multiple choice questions arranged as practice papers of 90 questions each The format is that used for the examination for Fellowship of the Royal College of Anaesthetists **Key Questions in Anaesthesia** Second Edition is an essential revision aid for all anaesthetists

**Preoperative Assessment and Perioperative Management** Mark Radford, Clare Evans, Alastair Williamson, 2011 Pre operative assessment of the surgical patient is a key part of the perioperative process However it is one that cannot be separated from the other aspects of perioperative management both clinical and administrative that ensures the safe and effective treatment of surgical patients There are a number of books on the market that examine perioperative management anaesthesia and surgical nursing that are only able to touch on the pre operative assessment process *Pre Operative Assessment Perioperative Management* sets out to be different by bridging the gap between these texts and the evolving and developing area of practice that pre operative assessment has become in modern healthcare In order to achieve this *Pre Operative Assessment Perioperative Management* has set out to deliver the core clinical aspects of practice linked to the education and service development needs of a perioperative service The challenge for such a book is to integrate this knowledge effectively using the best evidence base for use in every day practice The brief to the contributors was to help define pre operative assessment utilising their expertise to draw out some of the leading practices and thoughts of the day They have achieved this ensuring that the reader has access to some of the leading experts in international perioperative practice They have done this in an open and accessible style that will guide the reader through some complex and demanding subjects to enable them to deliver better front line care to surgical patients
