Immunopharmacology of Joints and Connective Tissues Clive P. Page, M. Elisabeth Davies, John T. Dingle, 1994-03-07 The consequences for diseases involving the immune system such as AIDS and chronic inflammatory diseases such as bronchial asthma rheumatoid arthritis and atherosclerosis now account for a considerable economic burden to governments worldwide In response there has been an enormous research effort investigating the basic mechanisms underlying such diseases and a tremendous drive to identify novel therapeutic applications for their preventions and treatment Though a plethora of immunological studies have been published in recent years little has been written about the implications of such research for drug development As a consequence this area has not gained the prominence of other new fields such as molecular pharmacology or neuropharmacology and a focal information source for many pharmacologists interested in diseases of the immune system remains unpublished The Handbook of Immunopharmacology series provides such a source through the commissioning of a comprehensive collection of volumes on all aspects immunopharmacology

Immunology of Rheumatic Diseases Sudhir Gupta, 2012-12-06 Recent developments in basic science and clinical rheumatology make it appropriate at this time to create a volume devoted to the immunology of rheumatic diseases The impact of molecular biology gene cloning and new technologies for establishing hybridomas and T cell lines in the laboratory is now beginning to be felt in clinical medicine There is a general air of excitement and a feeling that we stand on the threshold of a new era in molecular medicine and clinical science It is this excitement that we have tried to capture in this book This volume is divided into five sections entitled Basic Mechanisms Autoimmunity Classical Concepts of Rheumatic Diseases Pathogenetic Mechanisms and Therapy This is not an arbitrary arrangement but represents our belief that from an understanding of basic mechanisms of disease pathogenesis will come new and more successful forms of treatment for the sufferers of rheumatic disorders We have tried in the selection of authors to choose internationally recognized experts who have both a scientific and a clinical orientation to their subjects We believe the marriage of clinical and basic disciplines represents the best hope for rapid knowledge transfer from the laboratory to the clinic where such knowledge can be used to

improve patient health Skills in Rheumatology E-Book Hani Almoallim, 2016-11-24 This book is a quick aid for any clinician dealing with patients with rheumatic diseases The major gap that we tried to fill by writing this book is the clinical relevance to practice It is hardly ever seen that a resident in rheumatology is carrying any book about rheumatology in his/her rotation Obviously because there are no good books with relevance to the daily practice a resident is facing Now here are the specific objectives of the book The chapters might be fulfilling more than one of these general objectives To construct a clinical approach to patients with arthritis To interpret laboratory findings in patients with rheumatic diseases To prescribe and monitor drugs used to treat patients with rheumatic diseases To construct a diagnostic approach to common medical problems in patients with rheumatic diseases To provide an update in the classification and management of common rheumatic diseases based on international societies The features and content in the book that will be most valuable The first part which represent the basics in rheumatology practice There will be a comprehensive chapter about how to approach history taking from patients presenting with a rheumatological problem There will be also a simplified approach to MSK examination of common joints from a rheumatological perspective with the intention to diagnose arthritis and not to be mixed with sports injuries or other soft tissue problems In the last section of the book we will bring the latest classification criteria and the latest recommendation for management guidelines they are so many in one section We are not considering our book as a reference in how to manage patients with RA or SLE by prescribing appropriate drugs We are going only to focus on the approach to the patients and providing the latest guidelines for management available for the reader of the book The Fibromyalgia Controversy Clement M. Hall, 2013-04-29 As many as fifteen million American women or 5 percent of the adult female population in the US suffer from the disabling medical condition known as fibromyalgia If one takes into account husbands partners children and other close relatives the proportion of the American population directly or indirectly affected by fibromyalgia could be as high as 10 percent or thirty million persons Nonetheless the medical community is divided over the reality of this condition One side argues sometimes heatedly that the patients are masquerading pretending a disability they know they do not have The other side counters with equal passion that fibromyalgia sufferers are abused by a society that fails to give them the support they deserve while painfully suffering from this severely debilitating illness Without taking sides Dr M Clement Hall presents six fictional though factually based case studies of typical patients from differing socioeconomic backgrounds and describes the varying investigations diagnoses and treatments they have undergone Each of these case studies represents a composite of many years of clinical practice rather than one specific patient Collectively they cover the range of experiences fibromyalgia patients are likely to have encountered By taking this unique approach Dr Hall presents an objective overview of the fibromyalgia situation today in North America Patients family members and physicians will see themselves reflected in the descriptions and will gain a broader understanding of this challenging illness M Clement Hall MD Toronto Ontario Canada now retired was the director of continuing education in the emergency department of
