Contemporary Appliqué Julia Triston, Rachel

Lombard, 2015-04-16 Appliqué is a classic embroidery technique that has recently been experiencing a revival. Appearing in the most cutting edge contemporary textile work, it can be interpreted in many different ways: layering, patching, applying, overlaying and offers endless creative possibilities. Each technical variation of appliqué has traditionally had its own set of boundaries, but nowadays all the rules are being broken and the technique has become relevant up to date and suitable for all varieties of textile art. This impressive book takes a fresh look at the world of appliqué and surface embellishment, showing you how to develop distinctive and individual designs, create exciting compositions and use unusual combinations of materials. It covers the traditional variations including bonded appliqué, broderie perse, cut away appliqué and Mola work and explains how the standard techniques can be developed to give exciting results in your own textile work in both hand and machine embroidery. Accompanying the techniques is a wealth of examples of contemporary appliqué to inspire you. The authors are renowned for their thoughtful, creative but practical approach to teaching textiles, making this book suitable for beginners and established textile artists alike. **On the Cutting Edge** Jeannette Lasansky, 1994 **Military Textiles** E.

Crafting Textiles in the Digital Age Nithikul Nimkulrat, Faith Kane, Kerry Walton, 2016-09-08 In an era of increasingly available digital resources many textile designers and makers find themselves at an interesting juncture between traditional craft processes and newer digital technologies Highly specialized craft design practitioners may now elect to make use of digital processes in their work but often choose not to abandon craft skills fundamental to their practice and aim to balance the complex connection between craft and digital processes The essays collected here consider this transition from the viewpoint of aesthetic opportunity arising in the textile designer's hands on experimentation with material and digital technologies available in the

present Craft provides the foundations for thinking within the design and production of textiles and as such may provide some clues in the transition to creative and thoughtful use of current and future digital technologies Within the framework of current challenges relating to sustainable development globalization and economic constraints it is important to interrogate and question how we might go about using established and emerging technologies in textiles in a positive manner
