Undiplomatic History Asa McKercher,Philip Van Huizen,2019-04-30 When the field of Canadian history underwent major shifts in the 1990s international history became marginalized and the focus turned away from foreign affairs Over the past decade however the study of Canada and the world has been revitalized Undiplomatic

History charts these changes bringing together leading and emerging historians of Canadian international and transnational relations to take stock of recent developments and to outline the course of future research Following global trends in the wider historiography contributors explore new lenses of historical analysis such as race gender political economy identity religion and the environment and emphasize the relevance of non state actors including scientists athletes students and activists The essays in this volume challenge old ways of thinking and showcase how an exciting new generation of historians are asking novel questions about Canadians interactions with people and places beyond the country s borders From human rights to the environment and from medical internationalism to transnational feminism Undiplomatic History maps out a path toward a vibrant and inclusive understanding of what constitutes Canadian foreign policy in an age of global connectivity

Knowledge and Pain ,2012-01-01 Pain studies both in exact sciences and in the humanities are a fast shifting field This volume condenses a spectrum of recent views of pain through the lens of humanistic studies Methodologically the volume is an interdisciplinary study of the questions pertaining to the accessibility of pain physical or emotional to understanding and of the possible influence of suffering on the enhancement of knowledge in private experience or public sphere Undeterred by the widespread belief that pain cannot be expressed in language and that it is intransmissible to others the authors of the essays in the collection show that the replicability of records and narratives of human experience provides a basis for the kind of empathetic attention dialogue and contact that can help us to register the pain of another and understand its conditions and contexts Needless to say the improvement of this understanding may also help map the ways for the ethics of response to and help for pain Whereas the authors of the volume tend to share the view of pain as a totally negative phenomenon the position taken in Elaine Scarry s *The Body in Pain* they hold this view applicable mainly to the attitudes to the pain of others and the imperative of minimise the causes of another s suffering They also consider this view to be culturally and temporally circumscribed The volume suggests that one s own personal experience of suffering along with the awareness of the seriality of such experience among fellow sufferers can be conducive to emotional and intellectual growth The reading of literature dealing with pain can lead to similar results through vicariously experienced suffering whose emotional corollaries and intellectual consequences may be conveyed through artistic rather than discursive means The distinctive features of the volume are that it processes these issues in a historicising way deploying the history of the ideas of pain from the Middle Ages to the present day and that it makes use of the methodology of different disciplines to do so arriving to similar conclusions through as it were different paths The disciplines include analytic philosophy historiography history of science oral history literary studies and political science Walter and Ingrid Trobisch and the Globalization of Modern, Christian Sexual Ethics Anneke H. Stasson,2021-05-13 Walter and Ingrid Trobisch played a major role in shaping a transcultural conversation about love sex gender identity and marriage during the mid twentieth century The Trobisches are most well known for Walter s book *I Loved a Girl* 1962 which he wrote while teaching at Cameroon Christian College Within

a decade one million copies of the book were in circulation it was translated into seventy languages and Trobisch had received ten thousand letters from African and American readers of the book asking for relational advice The Trobisches founded an international marriage counseling ministry to answer these letters While the Trobisches held paternalistic attitudes common among western missionaries of their generation their vision of sexuality helped Christians in Africa and the United States to navigate changing sexual norms of the mid twentieth century

Your Best Birth Ricki Lake, Abby Epstein, 2009-05-01 The national C section rate is at an all time high of 31 percent Are all these C sections necessary or are some of them done simply for the sake of convenience Inductions seem to be the norm but are they always needed Today expectant mothers are often left feeling powerless as their instincts are replaced by drugs and routine medical procedures What you are about to discover is that you have a choice and you have the power to plan the kind of birth that s right for you whether it is at a birth center a hospital or at home In Your Best Birth internationally known advocates of informed choice Ricki Lake and Abby Epstein inspire women to take back the birth experience with essential advice on Positive and negative effects of epidurals Pitocin and other drugs and interventions Inducing vs allowing your labor to progress naturally The truth behind our country s staggering C section rate Assembling your birth team and creating your birth plan With chapters such as Obstetricians Finding Dr Right Epidurals You Haven t Got Time for the Pain and Electronic Monitors Reading between the Lines Lake and Epstein will encourage you to consider whatever your doctor mother and best friend may suggest in a new light The book also includes inspiring birth stories including those from well known personalities such as Laila Ali and Cindy Crawford Packed with crucial advice from childbirth professionals and delivered in a down to earth engaging voice Your Best Birth is sure to renew your confidence and put the control back where it belongs with parents to be Abby Epstein and Ricki Lake have taken a wonderful and constructive approach to ensuring an optimal birthing experience Their language creates a climate of confidence for pregnant women and their families who must make key decisions about where how and with whom to give birth in a health care system often unresponsive to our needs This book is like a good friend giving wise counsel Judy Norsigian co editor of Our Bodies Ourselves Pregnancy and Birth and Executive Director Our Bodies Ourselves

Home Birth Alice Gilgoff, 2016-02-16 For women who believe that childbirth is a normal event and that hospitals are places to treat illness home birth with a licensed professional midwife is a safe and viable option Unlike the rest of the world where home birth and midwifery are the norm Western society has captured the traditional childbirth model and recreated it as a high tech pathological event fraught with dangerous interventions Yet the United States continues to rank 20th or worse in United Nations statistics of maternal and infant mortality When this book was first published in 1978 the convergence of the back to nature and feminist movements and the rise of consumer advocacy in health care contributed to a growing home birth movement Today a 40% cesarean rate and the universal acceptance of stay in bed electronic fetal monitoring an unproven technology are just two of the common hospital occurrences that keep some women at home for childbirth Midwife comes

from the German word that translates as with woman Research has shown that the close observation of an educated and caring woman makes birth complications predictable or preventable Studies published in medical literature have documented that the care of educated professional midwives is equal to or better than that of medical doctors whether the birth takes place in the home or hospital Home Birth reports on this research as well as personal practical stories of real childbearing families The book reviews typical birth practices and gives advice on preparing both the family and the home for the event There is also a chapter on preparing for hospital birth should a transport in labor become necessary

Motherdom Alex Bollen, 2025-03-04 When Alex Bollen had her first baby the fear of being a bad mother made her guilty and anxious A researcher with twenty years experience she went looking for answers To her surprise the studies she looked at were exaggerated and misrepresented in the media forming the foundation for what she calls Good Mother myths These myths are an assortment of narratives ideologies and stereotypes deployed to censure mothers and blame them for every societal ill Incensed by the way bad science is used to shame mothers Alex Bollen decided to set the record straight With meticulous research and keen insight Motherdom exposes both the shaky science and unjustified prescriptions about how mothers should naturally behave Competing visions of birth natural versus medical mean women can be criticised whatever happens raising the odds that birth will be a damaging even deadly experience Mothers are judged and belittled whether they breast or bottle feed their babies Bogus claims about brain development and dodgy attachment theories mean that whatever mothers do it is never enough This has to stop We must replace Good Mother myths with a realistic approach to parenting Alex Bollen proposes motherdom a more expansive conception of motherhood which values and respects the different ways people raise their children Instead of finding fault with mothers Motherdom shifts our focus to the relationships and resources children need to flourish

Women, Power, and Childbirth Kathleen D. Turkel, 1995-11-06 Based on her 12 year study of a free standing birth center Turkel analyzes the medical model of childbirth in contrast to the midwifery model In the medical model of birth women are defined as patients and birth takes place in hospitals where women have little if any control over their experience The midwifery model views birth as a healthy process where midwives act as teachers and guides for women during pregnancy and birth helping women and their families to shape and define their experience to meet their needs and expectations Under existing legal and cultural circumstances free standing birth centers face a dilemma They must continually accomodate the medical model while trying to maintain the midwifery model and give women an option to home birth or to hospital birth

Breathing in Manhattan Christoph Ribbat, 2023-04-03 In 1938 gymnastics instructor Carola Spitz escaped from Nazi Germany In New York she turned into Carola Speads revered teacher of mindfulness She breathed with clients in her Central Park West studio until she was 97 years old Now Christoph Ribbat combines her gripping biography with the histories of modern bodywork and breathing experiments He illuminates the tension between self help fads and 20th century catastrophes Accessible and quirky Breathing in Manhattan speaks to

experts and non experts alike to readers of Jewish history students of New York City and to anyone attracted by or skeptical of the promises of mindfulness *Lamaze* Paula A. Michaels,2014-02-20 Reveals the surprising history of the Lamaze method of childbirth also known as psychoprophylaxis by tracing this psychological non pharmacological approach to obstetric pain relief from its origins in the USSR in the 1940s to France in the 1950s and to the United States in the 1960s and 1970s *Coming Home* Wendy Kline,2019 *Coming Home* tells the story of how a significant number of parents in postwar America opted out of the standardized medicated hospital birth and recast home birth as a legitimate and desirable choice
