Based on the experiments on reincarnation and children remembering their past life it is believed that there is continuity of life after death In order to explain a model has been suggested in the book It is further believed that the soul is not made of matter as we see everywhere It is perhaps composed of very fine particles much shorter than atoms or even subatomic particles Such a material has to be discovered Techniques for detection of soul by scientific instruments have to be developed The book has further described what a soul may be able to do or it may not be able to do While the model solves many

questions it generates some questions that have to be solved It is believed by the author that in the near future most of these problems may be solved and scientific existence of soul may be confirmed Second part of the book describes twelve stories on manifestation of soul
