R. Bawa Muhaiyaddeen,2017-12-31 What is Islam Why do Muslims say Islam is peaceful This book speaks not only to Muslims but to all humankind as well about the tragic situation in the world today The remarkable words of Muhammad Raheem Bawa Muhaiyaddeen Ral address the endless conflicts in Jerusalem His words show us what must be done to achieve true peace in Jerusalem in the world and in

our hearts Everything is there in Jerusalem That is why everyone has fought over it Those with faith have fought over it and those without faith have fought over it All they have found is destruction No one who ruled there ever remained there They ruled for just a few short days Thus we who are here now must think of this Think of this you who are here now It can bring a great benefit Everything can change M R Bawa Muhaiyaddeen Jerusalem today demonstrates the proof of how places of worship to which everyone should be able to go in unity are turned into battlefields All of us must understand the battlefield in which the proof has been revealed All of us must understand this We who have been born as human beings must realize the words of the prophets the commandments of God and their instructions of unity No one who ruled in Jerusalem in the past is there anymore Not one person who came to rule Egypt Jerusalem or the world is still there M R Bawa Muhaiyaddeen

Art and Representation John Willats,1997 In Art and Representation John Willats presents a radically new theory of pictures To do this he has developed a precise vocabulary for describing the representational systems in pictures the ways in which artists engineers photographers mapmakers and children represent objects His approach is derived from recent research in visual perception and artificial intelligence and Willats begins by clarifying the key distinction between the marks in a picture and the features of the scene that these marks represent The methods he uses are thus closer to those of a

modern structural linguist or psycholinguist than to those of an art historian Using over 150 illustrations Willats analyzes the representational systems in pictures by artists from a wide variety of periods and cultures He then relates these systems to the mental processes of picture production and displaying an impressive grasp of more than one scholarly discipline shows how the Greek vase painters Chinese painters Giotto icon painters Picasso Paul Klee and David Hockney have put these systems to work But this book is not only about what systems artists use but also about why artists from different periods and cultures have used such different systems and why drawings by young children look so different from those by adults Willats argues that the representational systems can serve many different functions beyond that of merely providing a convincing illusion These include the use of anomalous pictorial devices such as inverted perspective which may be used for expressive reasons or to distance the viewer from the depicted scene by drawing attention to the picture as a painted surface Willats concludes that art historical changes and the developmental changes in children's drawings are not merely arbitrary nor are they driven by evolutionary forces Rather they are determined by the different functions that the representational systems in pictures can serve Like readers of Ernst Gombrich's famous *Art and Illusion* still available from Princeton University Press on which *Art and Representation* makes important theoretical advances or Rudolf Arnheim's *Art and Visual Perception* Willats's readers will find that they will never again return to their old ways of looking at pictures
