That Far Greater Bay:

The Great Bay Dale Pendell, 2010-08-31 WINNER Best Science Fiction 2010 Green Book Festival Based in scientific reality Dale Pendell presents a powerful fictional vision of a fast approaching future in which sea levels rise and a decimated population must find new ways to live The Great Bay begins in 2021 with a worldwide pandemic followed by the gradual rising of the seas Pendell's vision is all encompassing he describes the rising seas impact on countries and continents around the world But his imaginative storytelling focuses on California A great bay forms in California's Central Valley and expands during a 16 000 year period As the years pass and technology seems to regress even memory of a precollapse world blends into myth Grizzly bears and other large predators return to the California hills and civilization reverts to a richly imagined medieval society marked by guilds and pilgrimages followed even later by hunting and gathering societies Pendell's focus is on the lives of people struggling with love wars and physical survival thousands of years in California's future He deftly mixes poetic imagery news reporting style writing interviews with survivors and maps documenting the geographic changes In the end powerful human values that have been with us for 40 000 years begin to reemerge and remind us that they are desperately needed in the present
