central to the belief systems supporting those notions In the final section authors offer critical evaluations of the main types of evidence for an afterlife Fully interdisciplinary The Myth of an Afterlife The Case against Life after Death brings together a variety of fields of research to make that case including cognitiveneuroscience philosophy of mind personal identity philosophy of religion moralphilosophy psychical research and anomalistic psychology As the definitive casebookof arguments against life after death this collection is required reading for anyinstructor researcher and student of philosophy religious studies or theology It issure to raise provocative issues new to readers regardless of background from thosewho believe fervently in the reality of an afterlife to those who do not or are undecidedon the matter **Commentaries on the**
