How organized resistance to new fossil fuel infrastructure became a political force and how this might affect the transition to renewable energy Organized resistance to new fossil fuel infrastructure particularly conflicts over pipelines has become a formidable political force in North America In this book George Hoberg examines whether such place based environmental movements are effective ways of promoting climate action if they might inadvertently feed resistance to the development of renewable energy infrastructure and what other more innovative processes of decision making would encourage the acceptance of clean energy systems Focusing on a series of conflicts over new oil sands pipelines Hoberg investigates activists strategy of blocking fossil fuel infrastructure often in alliance with Indigenous groups and examines the political and environmental outcomes of these actions After discussing the oil sands policy regime and the relevant political institutions in Canada and the United States Hoberg analyzes in detail four anti pipeline campaigns examining the controversies over the Keystone XL the most well known of these movements and the first one to use infrastructure resistance as a core strategy the Northern Gateway pipeline the Trans Mountain pipeline and the Energy East pipeline He then considers the resistance dilemma the potential of place based activism to threaten the much needed transition to renewable energy He examines several episodes of resistance to clean energy infrastructure in eastern Canada and the United States Finally Hoberg describes some innovative processes of energy decision making including strategic environment assessment and cumulative impact assessment looking at cases in British Columbia and Lower Alberta      **The Grave: A Dark Epic Hollywood Tale** M. The familiar old world of classical music with its wealthy donors and ornate concert halls is

changing The patronage of a wealthy few is being replaced by that of corporations leading to new unions of classical music and contemporary capitalism In *Composing Capital* Marianna Ritchey lays bare the appropriation of classical music by the current neoliberal regime arguing that artists critics and institutions have aligned themselves and by extension classical music itself with free market ideology More specifically she demonstrates how classical music has lent its cachet to marketing schemes tech firm sponsored performances and global corporate partnerships As Ritchey shows the neoliberalization of classical music has put music at the service of contemporary capitalism blurring the line between creativity and entrepreneurship and challenging us to imagine how a noncommodified musical practice might be possible in today s world
