Thompson,2024-03-22 Country music maintains a special decades long relationship to American military life but these ties didn t just happen This readable history reveals how country music s Nashville based business leaders on Music Row created partnerships with the Pentagon to sell their audiences on military service while selling the music to servicemembers Beginning in the 1950s the military flooded armed forces airwaves with the music hosted tour dates at bases around the world and drew on artists from Johnny Cash to Lee Greenwood to support recruitment programs Over the last half of the twentieth century the close connections between the Defense Department and Music Row gave an economic boost to the white dominated sounds of country while marginalizing Black artists and fueling divisions over the meaning of patriotism This story is filled with familiar stars like Roy Acuff Elvis Presley and George Strait as well as lesser known figures industry executives who worked the halls of Congress country artists who dissented from the stereotypically patriotic trappings of the genre and more Joseph M Thompson argues convincingly that the relationship between Music Row and the Pentagon helped shape not only the evolution of popular music but also race relations partisanship and images of the United States abroad **Country Market Survey** ,1979 *All Music Guide to Country* Michael Erlewine,1997-06 Reviews and rates the best recordings of country artists and groups provides biographies of the artists and charts the evolution of country music *NBER Macroeconomics Annual 1995* Ben S. Sachs,2007-12-01 For dozens of developing countries the financial upheavals of the 1980s have set back economic development by a decade or more Poverty in those countries have intensified as they struggle under the burden of

an enormous external debt In 1988 more than six years after the onset of the crisis almost all the debtor countries were still unable to borrow in the international capital markets on normal terms Moreover the world financial system has been disrupted by the prospect of widespread defaults on those debts Because of the urgency of the present crisis and because similar crises have recurred intermittently for at least 175 years it is important to understand the fundamental features of the international macroeconomy and global financial markets that have contributed to this repeated instability Developing Country Debt and the World Economy contains nontechnical versions of papers prepared under the auspices of the project on developing country debt sponsored by the National Bureau of Economic Research The project focuses on the middle income developing countries particularly those in Latin America and East Asia although many lessons of the study should apply as well to other poorer debtor countries The contributors analyze the crisis from two perspectives that of the international financial system as a whole and that of individual debtor countries Studies of eight countries Argentina Bolivia Brazil Indonesia Mexico the Philippines South Korea and Turkey explore the question of why some countries succumbed to serious financial crises while other did not Each study was prepared by a team of two authors a U S based research and an economist from the country under study An additional eight papers approach the problem of developing country debt from a global or systemic perspective The topics they cover include the history of international sovereign lending and previous debt crises the political factors that contribute to poor economic policies in many debtor nations the role of commercial banks and the International Monetary Fund during the current crisis the links between debt in developing countries and economic policies in the industrialized nations and possible new approaches to the global management of the crisis

The Soils of the Philippines Rodelio B. Carating, Raymundo G. Galanta, Clarita D. Bacatio, 2014-04-23 The first soil survey in the Philippines was done by Mr Clarence Dorsey an American soil scientist in the province of Batangas in 1903 The Soils of the Philippines however is the first comprehensive summary of more than a century of soil survey work in this country It integrates the soil concepts of the reconnaissance soil survey results which commenced as early as 1934 and continued until the mid 1960s with the semi detailed soil surveys that continue to this day The result is the first ever genetic key for classifying Philippine soils at soil series level thus making it possible for any newcomers to the soil survey field to confidently produce their own soil map at a more detailed map scale to suit the project requirements This book brings together discussions on soils and soil mapping units and up to date international techniques and technologies It makes soils relevant to current political realities and national issues As soil survey moves from a reductionist agricultural development planning tool to a more holistic and integrated approach to enable us to understand our dynamic and complex environment The Soils of the Philippines will be the only source of authoritative and updated data on soil resources for macro level resource management planning for

decades to come With a vanishing breed of experienced soil surveyors not only in the Philippines but also worldwide it may remain the only book on Philippine soils for the next hundred years or more Since soils follow a geological and not a human time frame the contents of this volume will stay relevant for soil surveyors even in a fast changing world As the country leaps from an agricultural economy towards modernization and a more diversified economic base some of the soil series in the Philippines for example the Guadalupe series underlying the skyscrapers of Makati City are becoming extinct as a result of urban development Therefore this book serves as the repository for the soils that we possess the soils that have been lost through decades of urbanization while at the same time it creates a soil classification system for the soils we are yet to discover

Income Distribution and High-quality Growth Vito Tanzi, Ke-young Chu, 1998 The contributors argue that there need not be a trade off between growth and equity in the long run However attempts by government to influence income distribution through large scale tax and transfer programs can have a negative impact on growth The contrast is vivid While the majority of people in the industrial world and some in the developing world enjoy unprecedented affluence a far greater number of people in the low income countries live in abject poverty Although several developing countries are achieving rapid economic growth and poverty reduction most formerly centrally planned countries are struggling to implement market oriented reforms in the midst of economic deterioration and rising poverty The paramount importance of reducing poverty worldwide is forcing economists and policymakers to look at how income distribution and economic growth interact The essays in this volume grew out of a 1995 conference sponsored by the International Monetary Fund The contributors are scholars and policymakers from academic institutions governments and international organizations The questions discussed include How does income distribution interact with economic growth in the short run and the long run To what extent can government use transfer programs to increase the incomes of the poor How can government use social programs to help the poor increase their income earning capacity Does distributional inequality create an obstacle to long term poverty reduction Alternatively is distributional inequality a necessary means of achieving economic growth Generally the contributors agree that there need not be a trade off between growth and equity in the long run However attempts by government to influence income distribution through large scale tax and transfer programs can have a negative impact on growth
