The 2004 Multi-Diet Anderson A. Anonymous,A. ANDERSON,2004-01-01 **Urban Food Production for Ecosocialism** Salvatore Engel-Di Mauro,George Martin,2021-09-05 This book explores the critical role of urban food production in strengthening communities and in building ecosocialism It integrates theory and practice drawing on several local case studies from seven countries across four continents China Cuba Ghana Italy Tanzania the UK and the US Research shows that the term urban agriculture overstates the limited food growing potential in cities due to a shortage of land required for growing grains the basic human food staple For this reason the book suggests urban cultivation as an appropriate term which indicates social and political progress achieved through combined labours of urbanites to produce food It examines how these collaborative food growing efforts help raise local social capital foster community organisation and create ecological awareness in order to promote urban food production while also ensuring environmental sustainability This book illustrates how urban cultivation constitutes a potentially important aspect of urban ecosystems as well as offers solutions to current environmental problems It recentres attention to the global South and debunks Eurocentric narratives challenging capitalist commercial food growing regimes and encouraging ecosocialist food growing practices Written in an accessible style this book is recommended reading about an emergent issue which will interest students and scholars of environmental studies geography sociology urban studies politics and economics **Tropical Conservation Biology** Navjot S. Sodhi,Barry W. Brook,Corey J. A. Bradshaw,2013-05-22 This introductory textbook examines diminishing terrestrial and aquatic habitats in the tropics covering a broad range of topics including the fate of the coral reefs the impact of agriculture urbanization and logging on habitat depletion and the effects of fire on plants and animal survival Includes case studies and interviews with prominent conservation scientists to help situate key concepts in a real world context Covers a broad range of topics including the fate of the coral reefs the impact of agriculture urbanization and logging on habitat depletion and the effects of fire on plants and animal survival Highlights conservation successes in the region and emphasizes the need to integrate social issues such as human hunger into a tangible conservation plan Documents the current state of the field as it looks for ways to predict future outcomes and lessen human impact Sodhi et al have done a masterful job of compiling a great deal of literature from around the tropical realm and they have laid out the book in a fruitful and straightforward manner I plan to use it as a reference and as supplemental reading for several courses and I would encourage others to do the same Ecology 90 4 2009 pp 1144 1145 Subject Guide to Books in Print ,1991
