often referred to as the queen of social sciences This is because mainstream economics has been established as an elegant academic discipline by assuming mankind simply to be homo economicus an image of human beings showing interest in only material fulfilment and acting solely in his interest This book challenges this basic perception of human beings By replacing it with a more realistic and multifaceted human motive as supported by research in various academic disciplines the book tries to provide a novel and more plausible picture of human society Specifically the book takes in such human aspects as

pursuing well being forming human networks and the realisation of potential of ability Thus if we try to better understand human motives and the society it becomes necessary to replace the conventional two sector market government social model with a more general and theoretically superior social model the three sector model consisting of market government non profit sectors This book demonstrates the validity of this new view by utilising basic principles of economic policy and social welfare analyses Moreover the book has introduced a newly developing practical philosophy in Japan over the last 50 years to achieve both individual well being and better human society

*The Compleat Biz* Rob Wherrett, 2009 This far sighted book shows how in the 21st Century we can develop a model for the organisation that is built on a philosophy that considers people and sustainability but above all else answers the question Why are we in business It is intended to help all those who seek to make their organisations rewarding places to work and at the same time be responsive to the world around them and the people involved This really is a different way of looking at what we do and why we do it Not from the standpoint of right or wrong but from understanding the overall consequences of our strategies and their execution It explodes several myths that plague management including the idea that never ending growth is an essential for success Importantly the writing looks forward and provides us with models that are very much in tune with the changing world and the need to reassess how we operate on planet earth It contains a serious message delivered in an engaging way with humour and insight drawing on real life situations and experience An intriguing approach to the complex problems that we call business
