James Popham, 2016-11-02 Amplify your assessment literacy Formative data driven high stakes we all know the buzzwords surrounding educational testing But often times we shelve our understanding of these terms because we think they are overwhelmingly complex After all isn t that why we have experts crafting assessments Those who care about our schools and students teachers administrators policymakers parents citizens will find The ABCs of Educational Testing the first accessible explanation of how and why having a fundamental understanding of educational testing is so important Inappropriate tests are currently leading to harmful decision making and this book gives you everything you need to know to change that including The purposes of tests The difference between and importance of reliability and validity How to build tests with fairness The importance of students affect Using a nontechnical and conversational approach this book offers fundamental knowledge to free you from testing foginess all framed around practical actions you can take today to strengthen your assessment literacy for tomorrow **School Reform, Corporate Style** Dorothy Shipps, 2006 Like other big city school systems Chicago s has been repeatedly reformed over the last century Yet its schools have fallen far short of

citizens expectations and left a gap between the performances of white and minority students Many blame the educational establishment for resisting change Other critics argue that reform occurs too often still others claim it comes not often enough Dorothy Shipps reappraises the tumultuous history of educational progress in Chicago revealing that the persistent lack of improvement is due not to the extent but rather the type of reform Throughout the twentieth century managerial reorganizations initiated by the business community repeatedly altered the governance structure of schools as well as the relationships of teachers to children and parents but brought little improvement while other more promising reform models were either resisted or crowded out Shipps chronicles how Chicago s corporate actors led abetted or restrained nearly every attempt to transform the city s school system then asks whether schools might be better reformed by others To show why city schools have failed urban children so badly she traces Chicago s reform history over four political eras revealing how corporate power was instrumental in designing and revamping the system Her narrative encompasses the formative era of 1880 1930 when teachers unions moderated business plans previously unexplored business activism from 1930 to 1980 when civil rights dominated school reform and the decentralization of the 1980s She also covers the uneasy cooperation among business associations in the 1990s to install the mayor as head of the school system a governing regime now challenged by privatization advocates Business people may be too wedded to a stunted view of educators to forge a productive partnership for change Unionized teachers bridle at the second class status accorded them by managers If reform is to reach deeply into classrooms Shipps concludes it might well require a new coalition of teachers unions and parents to create a fresh agenda that supersedes corporate interests This study clearly shows that in Chicago as elsewhere urban schooling is intertwined with politics and power By reviewing more than a century of corporate efforts to make education work Shipps makes a strong case that it s high time to look elsewhere perhaps to educators themselves for new leadership

The Indianapolis ABCs Paul Debono,2015-08-01 The Indianapolis ABCs were formed around the turn of the century playing company teams from around the city they soon played other teams in Indiana including some white teams Their emergence coincided with

the remarkable growth of black baseball and by 1916 the ABCs won their first major championship When the Negro National League was formed in 1920 Indianapolis was one of its charter members But player raids by the Eastern Colored League formed in 1923 hurt the ABCs and by the Depression the team was fading into oblivion The team was briefly resurrected as a Negro league team in the late 1930s but was otherwise relegated to the semiprofessional ranks until its demise in the 1940s Through contemporary newspaper accounts extensive research and interviews with the few former ABC players still living this is the story of the Indianapolis team and the rise of Negro League baseball The work includes a roster of ABC players with short biographies of the most prominent

The ABCs of Writing for Children ,2002 **Race J.** Kameron Carter,2008-09-02 In Race A Theological Account J Kameron Carter meditates on the multiple legacies implicated

in the production of a racialized world and that still mark how we function in it and think about ourselves These are the legacies of colonialism and empire political theories of the state anthropological theories of the human and philosophy itself from the eighteenth century Enlightenment to the present Carter s claim is that Christian theology and the signal transformation it along with Christianity underwent is at the heart of these legacies In that transformation Christian anti Judaism biologized itself so as to racialize itself As a result and with the legitimation of Christian theology Christianity became the cultural property of the West the religious ground of white supremacy and global hegemony In short Christianity became white The racial imagination is thus a particular kind of theological problem Not content only to describe this problem Carter constructs a way forward for Christian theology Through engagement with figures as disparate in outlook and as varied across the historical landscape as Immanuel Kant Frederick Douglass Jarena Lee Michel Foucault Cornel West Albert Raboteau Charles Long James Cone Irenaeus of Lyons Gregory of Nyssa and Maximus the Confessor Carter reorients the whole of Christian theology bringing it into the twenty first century
