The Oldest Vocation Clarissa W. Atkinson, 2019-03-15 According to an old story a woman concealed her sex and ruled as pope for a few years in the ninth century Pope Joan was not betrayed by a lover or discovered by an enemy her downfall came when she went into labor during a papal procession through the streets of Rome From the myth of Joan to the experiences of saints nuns and ordinary women **The Oldest Vocation** brings to life both the richness and the troubling contradictions of Christian motherhood in medieval Europe After tracing the roots of medieval ideologies of motherhood in early Christianity Clarissa W Atkinson reconstructs the physiological assumptions underlying medieval notions about women s bodies and reproduction inherited from Greek science and popularized through the practice of midwifery these assumptions helped shape common beliefs about what mothers were She then describes the development of spiritual motherhood both as a concept emerging out of monastic ideologies in the early Middle Ages and as a reality in the lives of certain remarkable women Atkinson explores the theological dimensions of medieval motherhood by discussing the cult of the Virgin Mary in twelfth century art story and religious expression She also offers a fascinating new perspective on the women saints of the later Middle Ages many of whom were mothers their lives and cults forged new relationships between maternity and holiness **The Oldest Vocation** concludes where most histories of motherhood begin in early modern Europe when the family was institutionalized as a center of religious and social organization Anyone interested in the status of motherhood or in women s history the cultural history of the Middle Ages or the history of religion will want to read this book

Motherhood and Meaning in Medieval Sculpture Marian Bleeke, 2017 An examination of women as mothers in medieval French sculpture What can medieval sculptural representations of women tell us about medieval women s experiences of motherhood Presumably the work of male sculptors working for clerical patrons these sculptures are unlikely to have been shaped by women s maternal experiences during their production Once produced however their beholders would have included women who were mothers and potential mothers thus opening a space between the sculptures intended meanings and other meanings liable to be produced by these women as they brought their own interests and concerns to these works of art Building on theories of reception and response this book focuses on interactions between women as beholders and a range of sculptures made in France in the twelfth through sixteenth centuries aiming to provide insight into women s experiences of motherhood particular sculptures considered include the Annunciation and Visitation from Reims cathedral the femme aux serpents from Moissac the transi of Jeanne de Bourbon Vendome the Eve from Autun and a number of French Gothic Virgin

and Child sculptures Marian Bleeke is Associate Professor of Art History and Chair of the Department of Art and Design at Cleveland State University

Women in Christianity in the Medieval Age Laura Kalas, Roberta Magnani, 2024-12-10 This volume offers a comprehensive introduction to and investigation of the multivocality of women's experience in the Middle Ages. In medieval Europe, women saw their role in the Christian Church and society progressively confined to conflicting models of femininity epitomised by the dichotomy of Eve/Mary. Classical views of gender predicated on misogynistic dichotomies which confined women to matter and the corruption of the flesh were consolidated in powerful male-dominated clerical institutions and widely disseminated. Towards the end of the Middle Ages, however, women's corporeality and somatic spirituality contributed to and influenced burgeoning modes of piety centred around the cult of the Virgin Mary and the veneration of the suffering body of Christ on the Cross. This shift in devotional practices afforded women as bodily beings the space for an increased level of self-expression, self-realisation and authority. Ranging from philosophical and theological enquiry to education and art as well as medical sciences and popular beliefs, the essays in this collection account for the complexities and richness of the conceptualisations and lived experiences of medieval Christian women. The book will be especially relevant to students and scholars of religion and history with an interest in medieval studies and gender. Whilst expounding the key strands of thinking in the field, it engages with and contributes to some of the latest scholarly research.

Women's Roles in the Middle Ages Sandy Bardsley, 2007-06-30 Information about women in this truly fascinating period from 500 to 1500 is in great demand and has been a challenge for historians to uncover. Bardsley has mined a wide range of primary sources from noblewomen's writing, court rolls, chivalric literature, laws and legal documents to archeology and artwork. This fresh survey provides readers with an excellent understanding of how women high and low fared in terms of religion, work, family, law, culture and politics and public life. Even though medieval women were divided by social class, religion, age, marital status, place and period, they were all subject to an overarching patriarchal structure and sometimes could transcend their inferior status. Numerous examples of these exceptional women and their words are included. Chapter 1 examines religion, focusing on women's roles in the early Christian church, the lives of nuns and other professional religious women such as anchoresses and Beguines, the participation of Christian laywomen and the experiences of Jewish and Islamic women in Western Europe. The second chapter examines women's work, looking in turn at the kinds of work performed by peasant women, townswomen and noblewomen. Women's roles within the family form the subject of the third chapter. This chapter follows women throughout the typical lifecycle from girl to widow, examining the expectations and experiences of women at each stage. Chapter 4, *Women and the Law*, focuses on the ways in which laws both restricted and protected women. It also considers the crimes with which women were most often charged and surveys laws regarding marriage and widowhood. Women's roles in creative arts form the basis of the fifth chapter, *Women and Culture*. This chapter examines women's roles as artists, authors, composers and patrons as well as investigating the ways in which women were represented.

in works produced by men Finally chapter 6 discusses women s experiences in politics and public life While women as a group were typically banned from holding positions of public authority some found ways to get around this stricture while others were able to exercise power behind the scenes The final chapter thus encapsulates a major theme of this book the interplay between broader patriarchal forces that limited women s status and autonomy and the role of individuals who were able to overcome or circumvent such forces Medieval women were as a group subordinate to their husbands and fathers but certain women under certain circumstances evaded subordination

Rural Space in the Middle Ages and Early Modern Age Albrecht Classen,2012-05-29 Older research on the premodern world limited its focus on the Church the court and more recently on urban space The present volume invites readers to consider the meaning of rural space both in light of ecocritical readings and social historical approaches While previous scholars examined the figure of the peasant in the premodern world the current volume combines a large number of specialized studies that investigate how the natural environment and the appearance of members of the rural population interacted with the world of the court and of the city The experience in rural space was important already for writers and artists in the premodern era as the large variety of scholarly approaches indicates The present volume signals how much the surprisingly close interaction between members of the aristocratic and of the peasant class determined many literary and art historical works In a surprisingly large number of cases we can even discover elements of utopia hidden in rural space We also observe how much the rural world was a significant element already in early medieval mentality Moreover as many authors point out the impact of natural forces on premodern society was tremendous if not catastrophic

Motherhood and Mothering in Anglo-Saxon England M. Dockray-Miller,2000-03-15 Motherhood and Mothering in Anglo Saxon England sifts through the historical evidence to describe and analyze a world of violence and intrigue where mothers needed to devise their own systems to protect nurture and teach their children Mary Dockray Miller casts a maternal eye on Bede the Anglo Saxon Chronicle and Beowulf to reveal mothers who created rituals genealogies and institutions for their children and themselves Little known historical figures queens abbesses and other noblewomen used their power in court and convent to provide education medical care and safety for their children showing us that mothers of a thousand years ago and mothers of today had many of the same goals and aspirations

Motherhood, Religion, and Society in Medieval Europe, 400-1400 Lesley Smith,Conrad Leyser,2016-04-22 Who can concentrate on thoughts of Scripture or philosophy and be able to endure babies crying Will he put up with the constant muddle and squalor which small children bring into the home The wealthy can do so but philosophers lead a very different life So according to Peter Abelard did his wife Heloise state in characteristically stark terms the antithetical demands of family and scholarship Heloise was not alone in making this assumption Sources from Jerome onward never cease to remind us that the life of the mind stands at odds with life in the family For all that we have moved in the past two generations beyond kings and battles fiefs and barons motherhood has remained a blind spot for medieval historians

Whatever the reasons the result is that the historiography of the medieval period is largely motherless. The aim of this book is to insist that this picture is intolerably one dimensional and to begin to change it. The volume is focussed on the paradox of motherhood in the European Middle Ages: to be a mother is at once to hold great power and by the same token to be acutely vulnerable. The essays look to analyse the powers and the dangers of motherhood within the warp and weft of social history, beginning with the premise that religious discourse or practice served as a medium in which mothers and others could assess their situation, defend claims and make accusations. Within this frame three main themes emerge: survival, agency and institutionalization. The volume spans the length and breadth of the Middle Ages from late Roman North Africa through ninth century Byzantium to late medieval Somerset, drawing in a range of types of historian including textual scholars, literary critics, students of religion and economic historians. The unity of the volume arises from the very diversity of approaches within it, all addressed to the central topic.

Motherhood in Antiquity Dana Cooper, Claire Phelan, 2017-03-07. This edited collection examines concepts and realities of motherhood in the ancient world. The collection uses essays on the Roman Empire, Mesoamerica, the Philippines, Egypt and India to emphasize the concept of motherhood as a worldwide phenomenon and experience. While covering a wide geographical range, the editors arranged the collection thematically to explore themes including the relationship between the mother, particularly ruling mothers and children, and the mother in real life and legend. Some essays explore related issues such as adaptation and child custody after divorce in ancient Egypt and the mother in religious culture of late antiquity and the ancient Buddhist Indian world. The contributors utilize a variety of methodologies and approaches including textual analysis and archaeological analysis in addition to traditional historical methodology.
