The Openness Of Being Natural Theology Today:

The Openness of Being Eric Lionel Mascall,1971 **The Openness of Being** Eric Lionel Mascall,1972 *The Openness of Being, Natural Theology Today* ,1971 **Richard Hooker and the Vision of God** Charles Miller,2013-07-25

Charles Miller's rigorous and sensitive examination of Richard Hooker's theology makes a valuable addition to the field of study of the cleric one of the founding theologians of modern Anglicanism. Miller examines Hooker's works in detail leading the reader through different facets of his vision of God, creation, Scripture, the sacraments, and practices of Christian devotion. Hooker's theology challenges an increasingly time-bound relativistic approach to doctrine and truth; his sources were as wide as ancient and as modern as Hooker could make them. Miller's thoughtful analysis is informed throughout by an understanding of the context of Hooker's theological development against the backdrop of continental Calvinism and the remnants of Roman Catholicism in England. The growth of interest in Hooker among specialists has been accompanied by an abandonment of the serious study of Hooker's thought among theological students, clergy, and theologians. Miller's work addresses this lack; Hooker's insights must not be forgotten in the daily distribution of theological food to Christian people. A study which attunes readers to Hooker's particular theological voice and teaches its value both in his own context and as a present-day interlocutor, this volume will be of great interest to Christians and theological students alike.

Three Theological Mistakes Ric Machuga,2015-01-05 Is the existence of God a matter of faith or knowledge? Does God sometimes act miraculously or are there physical causes for everything? Is morality absolute or relative? Are humans truly free or does God's sovereignty determine everything? When bad things happen, is God the cause or are they the fault of humans? Too frequently Christians answer these questions with a Yes to one side and a No to the other side. Thomas Aquinas and Karl Barth answer Yes to both. Following their model, Machuga defends a third way which transcends the Enlightenment dichotomies of fideism vs rationalism, supernaturalism vs naturalism, relativism vs absolutism, free will vs predestination, and God's justice vs his mercy. Machuga begins by showing how these false dichotomies grew out of the Enlightenment assumptions of mechanism, universal quantification, and mono-causation. He then corrects these demonstrably dubious assumptions by articulating a theory of dual causation. The result is a thoroughly biblical understanding of God, miracles, and free will that can withstand the contemporary criticisms of both science and philosophy.

Hidden and Revealed Dmytro Bintsarovskiy,2021-07-14 A major contribution to ecumenical reflection on the doctrine of God. The past century has seen renewed interest in the doctrine of God. While theological traditions disagree, their shared commitment to Nicene orthodoxy provides a common language for thinking and speaking about God. This dialogue has deepened our understanding of this shared way of thinking about God, but little has been done across ecumenical lines to explore God's hiddenness in revelation. In *Hidden and Revealed*, Dmytro Bintsarovskiy explores the hiddenness and revelation of God in two separate theological streams: Reformed and Orthodox. Bintsarovskiy shows that an understanding of both traditions reflects a deep structure of

shared language history and commitments while nevertheless reflecting real differences With Herman Bavinck and John Meyendorff as his guides Bintsarovskiy advances ecumenical dialogue on a doctrine central to our knowledge of God

Theological Anthropology at the Beginning of the Third Millennium Kevin Wagner, Peter John McGregor, M. Isabell Naumann, 2022-04-29 Theological Anthropology at the Beginning of the Third Millennium is the third volume of the Theology at the Beginning of the Third Millennium series Bringing together Catholic and Orthodox scholars of diverse disciplines this work sheds new light on the question what does it mean to be a human person Beginning with an overview on the state of the discipline in our time the book brings theological anthropology into dialogue with epistemology Christology science spiritual theology and pedagogy It explores how human persons who are created in God's image and likeness can come to knowledge of the self and the other such that the individual person can know love and be united to the God and Father of Jesus Christ

Christianity and the Rights of Animals Andrew Linzey, 2016-03-03 Christian concern about how we treat animals has increased strikingly in recent years More and more Christians are deciding that our attitudes toward animals must change Here is a book that presents for the first time a comprehensive and well argued theological case for the rights of animals and offers a challenging critique of our existing insensitivity toward animal life Everyone who cares about the rights of animals particularly clergy and ministers who are constantly being asked for answers on the issue will welcome this new and important book

The Dialectics of Creation Martin G. Poulson, 2014-03-13 This book investigates the philosophical components of Christian faith in creation by analyzing the distinction and the relation between creation and its Creator The writings of Edward Schillebeeckx and David Burrell supply a terminology of distinction and relation that shapes the discourse following in the footsteps of Aquinas Poulson elucidates the relational dialectic in the thought of Schillebeeckx as a way of thinking about the Creation and offers a helpful comparison with the thought of David Burrell Relational dialectic is an organizing principle not only of Schillebeeckx's account of creation but of his philosophical theology more generally It can operate as a hermeneutic for his material on praxis and humanism in a way that resolves some problems noted by other Schillebeeckx scholars Poulson's interpretation of Schillebeeckx enriches current approaches to this thinker and offers a significant contribution to thinking on the doctrine of Creation and issues surrounding the ontological distinction which is of major concern in philosophical theology today

"In the Beginning . . ." Eduardo J. Echeverria, 2011-01-01 One of the most significant contributions of Pope John Paul II to the church and arguably to the culture was his development of a theology of the body This theology explores the rich meaning and vocation of human embodiment of the body person in light of the fundamental truths of creation fall into sin and redemption in Jesus Christ In this book Eduardo J Echeverria inquires into the biblical theological and philosophical foundations of the Pope's theology of the body In a wide ranging discussion of a Catholic theology of revelation biblical hermeneutics and a biblical perspective on the Christ centered dynamics of the moral life Echeverria clearly establishes the fundamental principles needed for a full understanding of John Paul II's thought He

probes the philosophical foundations of the Pope's thought in the context of a Catholic theology of nature, sin, and grace. The book concludes with an analysis of the normative implications of the Pope's theology for sexual ethics and provides a novel and provocative application of the theology of the body to the morality of homosexuality. Echeverría's study of John Paul II's theology of the body helps us to make sense of how the Pope's theology deepens our understanding of the Catholic teaching that the human body shares in the dignity of the image of God. Catechism of the Catholic Church, no. 364.
