The Power Of Ideology:

The Ideology of Power and the Power of Ideology Göran Therborn, 1999-07-17 Few concepts have been so intensively discussed or so widely sponsored as that of ideology Whether read as the expression of social classes or attributed a material independence and efficacy whether devalued as false and non scientific or asserted as the necessary element of social practice ideology has become an ineluctable conceptual reference across a range of works dealing with subjects as varied as science and politics gender and cultural production In this book Göran Therborn makes a decisive contribution to the contemporary debate Beginning with some critical reflections on Louis Althusser's influential writings in the late sixties Therborn develops a theory of the formation of human subjects He then goes on to consider the material matrix of ideologies and the problem of ideological change the ideological constitution of classes and the characteristics of the discursive order that regulates it Turning to questions of state power and political struggle Therborn provides a remarkable account of ideological domination that displaces traditional categories and a fascinating analysis of the process of political mobilization Brief yet wide ranging probing yet succinct **The Ideology of Power and the Power of Ideology** is a work of theoretical exploration that establishes new bearings for the current discussion of ideology

The Power of Negative Thinking Benjamin Schreier,2009-04-20 Benjamin Schreier is suspicious of a simple equation of cynicism with quietism nihilism selfishness or false consciousness and he rejects the notion that modern cynicism represents something categorically different from the classical outlook of Diogenes He proposes instead that cynicism names the difficult position of not being able to recognize the relevance of democratic social norms in the future and yet being nonetheless invested in the power of these norms to determine cultural identity and to regulate social practices In his readings of Henry Adams s Education Willa Cather s The Professor s House F Scott Fitzgerald s The Great Gatsby and Nathanael West s Miss Lonelyhearts the author affirms that cynicism is an important and under appreciated current in mainstream modern American literature He finds that far from the simple selfishness or apathy for which it is so often dismissed the cynicism in these texts is suffused by a desire for the certainty promised by norms such as national teleology ethnic identity and civic participation But without faith in the relevance of these regulating terms cynics lack ready accounts of America and of their place in it Schreier s focus is not only on the cynical characters in the texts but also on the textual and epistemological strategies used to render normative narratives recognizably legitimate in the first place In his refusal to historicize cynicism away with generalized claims about American society Schreier argues instead that cynicism stages an unanswerable challenge to the specific expectations through which normative accounts of history become visible The Power of Negative Thinking makes a vital and wide ranging contribution to our understanding of American literature intellectual and cultural history philosophy ethics and politics Schreier s close reading and his vigorous theoretical examination of analytical first principles combine to make a book that is valuable not only to the study of methodology but also to the scrutiny of the very assumptions the humanities bring to the exploration of the way we think

The Necessity of Social Control István Mészáros, 2014-01-26 As John Bellamy Foster writes in his foreword to the present book Istv n M sz ros is one of the greatest philosophers that the historical materialist tradition has yet produced His work stands practically alone today in the depth of its analysis of Marx s theory of alienation the structural crisis of capital the demise of Soviet style post revolutionary societies and the necessary conditions of the transition to socialism His dialectical inquiry into social structure and forms of consciousness a systematic critique of the prevailing forms of thought is unequalled in our time M sz ros is the author of magisterial works like Beyond Capital and Social Structures of Forms of Consciousness but his work can seem daunting to those unacquainted with his thought Here for the first time is a concise and accessible overview of M sz ros s ideas designed by the author himself and covering the broad scope of his work from the shortcomings of bourgeois

The Power of the Buddhas sem Versmeersch, 2020-03-17 Buddhism in medieval Korea is characterized as State Protection Buddhism a religion whose primary purpose was to rally support supernatural and popular for and legitimate the state In this view the state used Buddhism to engender compliance with its goals A closer look however reveals that Buddhism was a canvas on which people projected many religious and secular concerns and desires This study is an attempt to specify Buddhism s place in Koryo and to ascertain to what extent and in what areas Buddhism functioned as a state religion Was state support the main reason for Buddhism s dominance in Koryo How actively did the state seek to promote religious ideals What was the strength of Buddhism as an institution and the nature of its relationship to the state What role did Confucianism the other state ideology play in Koryo This study argues that Buddhism provided most of the symbols and rituals and some of the beliefs that constructed an aura of legitimacy but that there was no single ideological system underlying the Koryo dynasty s legitimating strategies

Risk, Power and the State Magnus Hörnqvist, 2010-02-25 Risk Power and the State addresses how power is exercised in and by contemporary state organisations Through a detailed analysis of programmatic attempts to shape behaviour linked to considerations of risk this book pursues the argument that whilst Foucault is useful for understanding power the Foucauldian tradition with its strands of discourse analysis of governmentality studies or of radical Deleuzian critique suffers from a lack of clarification on key conceptual issues Oriented around four case studies the architecture of the book devolves upon the distinction between productive and repressive power The first two studies focus on productive power the management of long term unemployment in the public employment service and cognitive behavioural interventions in the prison service Two further studies concern repressive interventions the conditions of incarceration in the prison service and the activity of the customs service These studies reveal that power as conceptualised within the Foucauldian tradition must be modified A more complex notion of productive power is needed which covers interventions that appeal to desires and which govern both at a distance and at close range Additionally the simplistic paradigm of repressive power is called into question by the need to consider the organising role of norms and techniques that circumvent agency Finally it is argued Foucault s concept of strategies which accounts for the thick web of administrative directives organisational routines and techniques that simultaneously shape the behaviour of targeted individuals and members of the organisation requires an organisational dimension that is often neglected in the Foucauldian tradition
