**Essays in Criminology** Mwene Mushanga, 2011-12-29 Crime in Africa is fast growing like African cities African poverty African indebtedness African brain drain and African dependence everything in Africa appears to be growing very fast population too has been fast growing except that it is being reduced by violence as we have witnessed in Rwanda Burundi and Somalia and AIDS pandemic that is first spreading in Africa claiming thousands of lives every year This book is a collection of essays and papers not based on empirical research on crime in East Africa but general observations arising out of the authors experience as a criminologist in East Africa      *Men in Families* Alan Booth, Ann C. Crouter, 1998-01-01 Recently the roles of fathers and husbands in families have been recognized as important issues They appear in legislation aimed at deadbeat dads social movements including the Million Man March and Promise Keepers in the development of advocacy groups and in think tanks Therefore contemporary research on men in family relationships has very mixed results Some studies show that fathers have small effects on child development and in preventing antisocial behavior whereas others suggest no effects Other research claims that the primary importance of men in families is in their role as providers Although some studies state that the husbands and fathers most vital work occurs in new families others indicate that it is when their

offspring reach adolescence Confusing the issue even further labor market trends predict that men s family roles may diminish Based on the presentations and discussions from a recent national symposium on men in families held at The Pennsylvania State University this book addresses these issues This is the only book that deals with men s involvement in families in a comprehensive way Although several books focus on fathers alone or on a broader family perspective this is the first book that deals with a variety of family roles on an interdisciplinary basis Although most of the writers are psychologists or sociologists there are key figures in history and anthropology who also make important contributions As such this volume will be useful to scholars students policy specialists and family program administrators **Cold War America, 1946 To**

**The American Journalist in the 1990s** David H. Weaver,G. Cleveland Wilhoit,2020-08-13 Who are U S journalists What are their backgrounds and educational experiences Why did they choose journalism as an occupation What do they think about their work What are their professional and ethical values What kinds of work do they consider their best Do men differ from women on these questions Do ethnic and racial minorities differ from the majority Do journalists working for different print and broadcast news media differ This book uses findings from the most comprehensive and representative study ever done of the demographic and educational backgrounds working conditions and professional and ethical values of 1 410 U S print and broadcast journalists working in the 1990s to answer these questions including separate analyses for women and minority news people It also compares many of these findings with those from the major studies of the early 1970s and 1980s As such it should be the standard reference on U S journalists for years to come In addition this study goes beyond the previous two in adding more open ended questions to explain and enrich quantitative findings in the belief that the numbers by themselves are not enough to provide explanations for the patterns that emerge This book includes more of the journalists own words to fill this gap as well as an analysis of samples of their self selected best work **The New**
