"Taxes Covered" Patricia Brandstetter,2011 This book provides an in depth analysis of recent case law and academic literature and sheds light on the background to the standard formulations used in the provision on the substantive scope of today s tax treaties Why this book The substantive scope of a tax treaty determines the extent of protection it can provide against international double taxation Countries worldwide have adopted the text of Art 2 Taxes covered of the OECD Model Tax Conventions in their bilateral tax treaties However the structure and wording of Art 2 which have remained virtually unchanged since the beginnings of tax treaty law in the 1920s create interpretive issues and uncertainties in practical treaty application This book not only provides an in depth analysis of

recent case law and academic literature but also sheds light on the background to the standard formulations so widely used in the provision on the substantive scope of today's tax treaties. The source documents used have rarely found their way into publications before historical OEC and OECD Reports and Minutes originally largely classified as restricted and thus inaccessible to the public for decades provide an insight into the drafting process of Art 2 and the discussions of Delegates from various nations on practical implications for treaty application. The book offers a unique perspective on this core treaty provision and aims to provide guidance for determining the taxes covered in any tax treaty.

The International Tax Law

Concept of Dividend Marjaana Helminen, 2017-05-02 The distribution of profits between corporations resident in different jurisdictions gives rise to both significant tax planning opportunities and tax risks. As cross border transactions between corporations grow in number and complexity the question of how a profit distribution is classified for corporate income tax purposes becomes increasingly important particularly in the context of issues such as double taxation non taxation and tax neutrality. The OECD BEPS project has only increased the relevance. This unique work discusses the international tax law rules determining which transactions may be classified and taxed as dividends and how possible classification conflicts may be resolved. The author examines the tax classification of various inter corporate transactions including Payments made under dividend stripping arrangements Fictitious profit distributions Economic benefits in the context of transfer pricing Returns on debt equity hybrids Interest payments in thin capitalization situations and distributions following liquidation. The analysis of each transaction refers to international tax law. Most weight is given to tax treaties and EU tax law including the BEPS development. The approaches adopted in different states national tax law are covered by a more general analysis. The comprehensive coverage and the practical nature of The International Tax Law Concept of Dividend make it an essential acquisition for tax practitioners researchers and tax libraries worldwide.

WTO and Direct Taxation Michael Lang, Judith Herdin, Ines Hofbauer, 2005-01-01 WTO Law and Direct Taxation are linked in numerous ways. The WTO Agreements thereof especially the GATT and GATS Agreements contain several explicit provisions on the subject of direct taxes or even on its delimitation from Tax Treaty Law. To some extent the scope of application of WTO Law has been broadened by case law to comprise also direct taxes. This entails overlappings particularly with regard to the law of subsidies prohibitions of discrimination and most favoured nation obligations. This book highlights increasingly relevant interdependencies between WTO Law and Direct Taxation from the viewpoint of 21 States. Special emphasis is placed on the conformity of national taxes on profits with WTO Law as well as on specifics of interpretation in several Member States. 21 National Reports from nearly all EU countries as well as Colombia Israel New Zealand Norway and the USA dealt with this topic and were compiled and published in this volume. Additionally a General Report prepared by Servatius van Thiel summarises the results of the National Reports. Moreover experts in this field joining the Conference among them Reuven Avi Yonah Michael Lennard and Raymond Luja have volunteered contributions dealing with specific problems of WTO and Direct Taxation.
