The Origins Of Marxian Thought:

The Origins of Marxian Thought Auguste Cornu, 1957 Marx, the Young Hegelians, and the Origins of Radical Social Theory Warren Breckman, 2001-02-19 This is the first major study of Marx and the Young Hegelians in twenty years. The book offers a new interpretation of Marx's early development, the political dimension of Young Hegelianism, and that movement's relationship to political and intellectual currents in early nineteenth century Germany. Warren Breckman challenges the orthodox distinction drawn between the exclusively religious concerns of Hegelians in the 1830s and the sociopolitical preoccupations of the 1840s. He shows that there are inextricable connections between the theological, political, and social discourses of the Hegelians in the 1830s. The book draws together an account of major figures such as Feuerbach and Marx with discussions of lesser known but significant figures such as Eduard Gans, August Cieszkowski, Moses Hess, F. W. J. Schelling, as well as such movements as French Saint Simonianism and positive philosophy. Wide ranging in scope and synthetic in approach, this is an important book for historians of philosophy, theology, political theory, and nineteenth century ideas.

A HISTORY OF POLITICAL THOUGHT SUBRATA MUKHERJEE, SUSHILA RAMASWAMY, 2011-08-09 This lucidly written text in its second edition continues to provide a comprehensive study of the classical political tradition from Plato to Marx. The book elucidates the fascinating evolution of the history of political ideas through the works of thirteen key political thinkers which includes Plato, Aristotle, Machiavelli, Hegel, and Marx. The text highlights the decline and revival of classical political theory and portrays the clash of universalism vs localism in the classical tradition. It focuses on the recent interpretations of the classical texts for instance feasibility of the ideal State in Plato, civic humanism and republicanism in Machiavelli, the radicalism of Locke, and the contributions to the woman's cause by John Stuart Mill. The text is intended for the undergraduate and postgraduate students of Political Science of various universities and for all those who are appearing for the civil services examinations. NEW TO THIS EDITION: Inclusion of two important liberal thinkers Mary Wollstonecraft, the founder of liberal feminism, and Immanuel Kant, a deontological liberal. Addition of an Appendix on John Rawls who is credited as a seminal thinker of contemporary times having played a crucial role in the revival of normative political theory.

Karl Marx and the Intellectual Origins of Dialectical Materialism J. White, 1996-10-25 The book provides a genealogy of dialectical materialism by tracing the development of Marxist ideas from their origins in German philosophical thought to the ideology of the social democratic groups in Russia in the 1890s from which Lenin and the revolutionary generation emerged. It reconstructs Marx's original conceptions and examines the modifications that were made to them by himself and by his Russian followers which eventually gave rise to the doctrine of dialectical materialism first expounded by Plekhanov.

The Nation in the History of Marxian Thought Charles C. Herod, 2012-12-06 This study is based upon the concept of nations with history and nations without history which was advanced in 1848-1849 in the pages of the *Neue Rheinische Zeitung*, a Cologne based German newspaper under the editorship of Karl Marx. This theory is presented in this

study as a model of opposites historic nations and non historic nations respectively revolutionary nations and counter revolutionary national groups which Engels and Marx associated with the philosophy of Hegel As Marx and Engels saw it Hegel had taught that nature and history abounded in opposites and this was believed to be the essence of his dialectic Marx liked this dialectic better than anything else in Hegel s thought and modified it to fit his own economic theory of history In reality however there are no categories of opposites certainly not in nature no two colors are opposites nor are any two times of the day indeed nothing temporal nothing living nothing that is in process of becoming It is only in human understanding that opposites are introduced In the history of ideas what has been a misunderstanding of Hegel s teachings has exerted a greater influence upon subsequent generations than Hegel s philosophy as he himself understood it With Marx s development of the materialistic concept of history the Volksgeist Spirit of the Age so pronounced in Hegel s work lost ground rapidly first because it was difficult to understand and second because its mastery was hardly rewarding to anyone save scholars and philosophers

Marxism and the Origins of International Relations José Ricardo Villanueva Lira, 2021-10-20 This book investigates to what extent and in what ways Marxist writings and precepts on imperialism informed the so called idealist stage of International Relations IR Though the formative years of International Relations coincide with a vibrant period in Marxist political thought Marxism is strikingly absent from the historiography of the discipline Building on the work of revisionist scholars the book reconstructs the writings of five benchmark IR thinkers Villanueva analyzes the cases of John Hobson Henry Brailsford Leonard Woolf Harold Laski and Norman Angell to explore the influence that Marxism played in their thinking and in the idealist years of the discipline more generally He ultimately demonstrates that although Marxist thought has been neglected by mainstream IR disciplinary historians it played a significant role in the discipline s early development As such this book both challenges the exclusion of Marxist thought from the mainstream disciplinary histories of IR and contributes to a deeper understanding of the role it played in early 20th century IR theory

A History of Marxian Economics, Volume I Michael Charles Howard, John Edward King, 2014-07-14 The first volume of this critical history covers the social political and theoretical forces behind the development of Marxian economics from Marx's death in 1883 until 1929 the year marking the onset of Stalin's revolution from above which subsequently transformed the Soviet Union into a modern superpower. During these years Marxists in both Russia and Germany found their economic ideas inextricably linked with practical political problems and treated theory as a guide to action. This book systematically examines the important theoretical literature of the period including insightful works by political functionaries outside academia, journalists, party organizers, underground activists, and teachers in the labor movement presented here as the primary forgers of Marxian economic thought. Beginning with Engels's writings, this book analyzes the work of leading Marxist economists in the Second International, then concludes with a review of the intellectual movements within the Marxian political economy during the 1920s. A second volume treating the period from 1929 to the present will follow. Originally published in 1989, The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

The History of Italian Marxism Paolo Favilli, 2016-08-15 In *The History of Italian Marxism* Paolo Favilli offers an articulated analysis of the different levels at which Marx's ideas and Marxism as a doctrinal system were received in Italy from the time of the First International up till the eve of the First World War. Rejecting any linear understanding of the relation between Marx's texts and the assumption of Marxism as the ideology of the burgeoning workers' movement, Favilli explores the growth of different forms of Marxist culture through the period of the Paris Commune, the late nineteenth-century debate on revisionism, and the rise of revolutionary syndicalism. Asking in each case whether Marxism meant a science, an ideology, a way of doing politics, a utopia, a myth, or a religion, Favilli goes on to assess which of these Marxisms died with and which have survived the crisis at the end of the twentieth century. With a new preface to the English edition. First published in Italian as *Storia del marxismo italiano dalle origini alla grande guerra* FrancoAngeli's r l Milan 1996.

The Anarchist Roots of Geography Simon Springer, 2016-08-01 *The Anarchist Roots of Geography* sets the stage for a radical politics of possibility and freedom through a discussion of the insurrectionary geographies that suffuse our daily experiences. By embracing anarchist geographies as kaleidoscopic spatialities that allow for nonhierarchical connections between autonomous entities, Simon Springer configures

a new political imagination Experimentation in and through space is the story of humanity's place on the planet and the stasis and control that now supersede ongoing organizing experiments are an affront to our survival Singular ontological modes that favor one particular way of doing things disavow geography by failing to understand the spatial as a mutable assemblage intimately bound to temporality Even worse such stagnant ideas often align to the parochial interests of an elite minority and thereby threaten to be our collective undoing What is needed is the development of new relationships with our world and crucially with each other By infusing our geographies with anarchism we unleash a spirit of rebellion that foregoes a politics of waiting for change to come at the behest of elected leaders and instead engages new possibilities of mutual aid through direct action now We can no longer accept the decaying archaic geographies of hierarchy that chain us to statism capitalism gender domination racial oppression and imperialism We must reorient geographical thinking towards anarchist horizons of possibility Geography must become beautiful wherein the entirety of its embrace is aligned to emancipation
