Guglielmo Marconi had transformed James Clerk Maxwell's theory of electromagnetic waves into a workable wireless telegraphy system and by 1907 Lee de Forest had invented the Audion a feedback amplifier and oscillator that opened the way to practical radio transmission Fifteen years after Marconi's invention wireless had become an essential means of communication as well as a hobby for many This book offers a new perspective on the early days of wireless communication Drawing on previously untapped archival evidence and recent work in the history and sociology of science and technology it examines the substance and context of both experimental and theoretical aspects of engineering and scientific practices in the first years of this technology It offers new insights into the relationship between Marconi and his scientific advisor the physicist John Ambrose Fleming inventor of the vacuum tube It includes the full story of the infamous 1903 incident in which Marconi's opponent Nevil Maskelyne interfered with Fleming's public demonstration of Marconi's syntonic tuning system at the Royal Institution by sending derogatory messages from his own transmitter The analysis of the Maskelyne affair highlights the struggle between Marconi and his opponents the efficacy of early syntonic devices Fleming's role as a public witness to Marconi's private experiments and the nature of Marconi's shows It also provides a rare case study of how the credibility of an engineer can be created consumed and suddenly destroyed The book concludes with a discussion of de Forest's Audion and the shift from wireless telegraphy to radio

*Reporting the Russo-Japanese War, 1904-5* Peter Slattery,2021-10-01 Large numbers of British military and naval officers as well as journalists and others observed the Russo Japanese War from close quarters But there was one journalist in particular the Times correspondent Lionel James who made war reporting history by gaining access to the conflict zone of the war at sea and reporting by wireless from a specially chartered ship as the action happened The full details of this remarkable and highly dangerous exploit have been carefully pieced together from official Times records and other sources by Peter Slattery and recorded here for the first time including the story of how the vital 180 foot timber wireless mast was built on the British leased tree less promontory of Weihaiwei on the China coast James s first report was published in The Times on 15 March

1904 he subsequently went on to file many other despatches including the sinking of the Russian flag ship the Petropavlovsk. The World Powers however were not ready to accept that a mere journalist should be allowed to exploit the new wireless technology to gain reporting advantage and forced James to give up causing him to move inland into Manchuria to continue his reporting of the war. From there he was to send a 5000 word story on one of the major land battles of the war at Liaoyang, the longest cable ever filed. There was also the matter of James' special deal with the Japanese Imperial Navy which only now has come to light.
