**Mineral Information Service** ,1967      Steward's Fork James K. Agee,2007-07-05 A compelling story of place Steward  
s Fork explores northwest California s magnificent Klamath Mountains a region that boasts a remarkable biodiversity a  
terrain so rugged that significant landscape features are still being discovered there and a wealth of natural resources that  
have been used and more recently abused by humans for millennia James K Agee a forest ecologist with more than fifty years  
experience in the Klamaths provides a multidimensional perspective on this region and asks how can we most effectively  
steward this spectacular landscape toward a sustainable future In an engaging narrative laced with personal anecdotes he  
introduces the dynamics of the Klamath s ecosystems including its geology and diverse flora and fauna and then discusses its  
native cultures and more recent inhabitants laying out the effects of industries such as logging mining water development  
and fishing Assuming that people will continue to have a close tie to the Klamaths Agee introduces the principles of  
restoration ecology to offer a vision of how we can responsibly meet the needs of both people and natural organisms  
including plants fish and wildlife This debate over the future of the Klamath s rich landscape widens into a provocative  
meditation on nature culture and our relationship with the earth itself      *Dictionary Catalog of the Research Libraries of the*
