Trotter,E. Lewis,T. Hunter,2004-03-17 From the early years of the African slave trade to America blacks have lived and laboured in urban environments Yet the transformation of rural blacks into a predominantly urban people is a relatively recent phenomenon only during World War One did African Americans move into cities in large numbers and only during World War Two did more blacks reside in cities than in the countryside By the early 1970s blacks had not only made the transition from rural to urban settings but were almost evenly distributed between the cities of the North and the West on the one hand and the South on the other In their quest for full citizenship rights economic democracy and release from an oppressive rural past black southerners turned to urban migration and employment in the nation's industrial sector as a new Promised Land or Flight from Egypt In order to illuminate these transformations in African American urban life this book brings together urban history contemporary social cultural and policy research and comparative perspectives on race ethnicity and nationality within and across national boundaries **Children in Foster Care** James Barber,Paul Delfabbro,Robyn Gilbertson,2004-08-02 Researchers practitioners journalists and politicians increasingly recognise that

foster care throughout the world is in a state of crisis There are more and more children needing care and as residential alternatives dry up more of these children are being assigned to foster families This book reports the major findings of a two year longitudinal study of 235 such children who entered the foster care system in Southern Australia between 1998 and 1999 As well as examining the changing policy context of children s services the book documents the psychosocial outcomes for these children their feedback on their experiences of care and the views of their social workers and carers In the process the book examines some cherished beliefs about foster care policy and sheds new light on them The research reveals that while most children do quite well in foster care up to the two year point there is a worrying amount of placement instability at a time when the concentration of emotionally troubled children in care is increasing throughout the western world Although surprisingly placement instability does not appear to produce psychosocial impairment for a period of up to eight months in care it has an extreme effect on children who are moved from placement to placement because no carer will tolerate their behaviour These children are consigned to a life of distribution and emotional upheaval because of the lack of alternative forms of care Another unexpected finding of the research is that increasing the rate of parental contact achieves little or nothing in relation to the likelihood of family reunification As child welfare increasingly enters a world of research based practice Children in Foster Care provides some much needed hard evidence of how foster care policy and practice can be improved
