humans in minutes a two inch caterpillar with toxic bristles that trigger hemorrhaging and a stunning blue ringed octopus capable of inducing total paralysis How do these animals go about their deadly work How did they develop such intricate potent toxins Wilcox takes us around the world and down to the cellular level to find out Throughout her journey Wilcox meets the intrepid scientists who risk their lives studying these lethal beasts as well as self immunizers who deliberately expose themselves to snakebites Along the way she puts her own life on the line narrowly avoiding being envenomated herself Drawing on her own research Wilcox explains how venom scientists are untangling the mechanisms of some of our most devastating diseases and reports on pharmacologists who are already exploiting venoms to produce lifesaving drugs We discover that venomous creatures are in fact keystone species that play crucial roles in their ecosystems and ours and for this alone they ought to be protected and appreciated Thrilling and surprising at every turn Venomous will change everything you thought you knew about the planet s most dangerous animals
