The Livestock and Wool Situation United States. Bureau of Agricultural Economics, 1942      Code of Federal Regulations, 1981 Special edition of the Federal Register containing a codification of documents of general applicability and future effect with ancillaries      Monthly Notes, Farm Management, and Farm Economics, 1950      *Communities of Resistance and Resilience in the Post-Industrial City* Daniel Holland, 2024-08-01 This book is about the grassroots community revitalization movement in Pittsburgh Pennsylvania and Lyon France between 1980 and 2010 an extension of the post WWII civil rights campaign that is rarely considered It tells the story of residents attempts to improve their communities through social capital or people power In positive ways citizens created vibrant attractive neighborhoods But their actions also generated unintended consequences such as high real estate prices and minority displacement that threatened to unravel their hard work *Communities of Resistance and Resilience* is an ethnographic survey that relies on oral histories archival research on the ground site surveys and the author s personal experience as a neighborhood reinvestment practitioner for more than 30 years It brings to life stories that would otherwise remain obscured such as the lingering impact of the March for Equality and Against Racism organized in Lyon in 1983 and the formation of the Pittsburgh Community Reinvestment Group in Pittsburgh in 1988 both of which launched national movements This is of great use to scholars of transatlantic history as well as a general audience interested in modern social movements in the United States and France      *Grazing Management* John F. Pearson, T.R. Dutson, 2012-12-06 The *Advances in Meat Research* series has arisen from a perceived need for a comprehensive coverage of certain topics that are pertinent to meat and meat products We the editors have made the decision to concentrate on a series of related topics that are deemed to be important to an understanding of meat both fresh and processed It is our sincere hope that by focusing upon areas related to meat science that researchers who contribute to this volume can not only update those involved in academia and industry but also promulgate facts that may lead to solutions of meat industry problems and aid in improving the efficiency of various associated industrial processes We have chosen to

devote Volume 1 to electrical stimulation in view of the widespread interest in its meat industry applications Although the classical study by A Harsham and Fred Deatherage was published in 1951 it was not accepted by the meat industry owing to a number of factors that are discussed in the text These investigators did however lay the groundwork for modern electrical stimulation of carcasses by their detailed studies on the effects of varying current voltage frequency wave forms and time The basic information provided by these workers saved a great amount of experimentation by those who subsequently rediscovered electrical stimulation
