smell within a humanities context Hajdini situates problems of olfaction at the very point of inception of cultural life He proposes that ontology civilization and capitalist economy alike can be said to amount to shit management And only by following the philosophically most deplorable of the senses the book argues can we better understand the central philosophical psychoanalytical and political issues of truth sex and exploitation

Odor Sensation and Memory

Trygg Engen, 1991-11-21 Our sense of smell as Trygg Engen reminds us early in this definitive work has been neglected as a research area This neglect belies the very critical role that the sense plays in human adaptation to the environment through the monitoring of odors Smell is learned through experience and results Engen maintains in a schema of memory system that enables individuals to process and categorize odors There are closer relationships between the individual detecting an odor the circumstances or environment and the reaction of pleasure or aversion than with the other senses When future occasions present the same or similar odors memory will bring back the early experience and directly affect the reaction to the new stimuli Engen sees odor perception as mainly psychological unlike the traditional approach which sees the sense largely as an innate mechanism with a direct physiological basis The research underlying this book is the most current in sensory cognition reminding the reader of the importance of the sense of smell through examples of what deprivation entails The author develops an appreciation of the odor sensing ability mankind has and explores the uses to which that sense is applied The ability to relate past to present perception odor memory and the gradations of odor impact

are discussed as well as the engaging questions of fragrances effects on behavior odors and sexuality mother infant bonding and pollution This book is essential reading for all who work in areas relating to sensory perception and cognition

Dinneen,1927 **Stinking Philosophy!** Benjamin Young,2024-08-06 The nature of olfaction its importance for understanding perennial issues of philosophy of mind perception and consciousness and its implications for cognitive neuroscience What are smells Despite the best efforts of philosophy and the chemosciences the question remains vexing but no more perplexing than the historical lapse of the past centuries to

seriously consider a sense that has a key place in philosophy of mind and perception Stinking Philosophy is Benjamin Young's answer to this critical lapse Drawing together more than a decade's research on olfactory philosophy the book offers a clear comprehensive look at the nature of odors how we perceive smells how we cognitively represent odors how we communicate about them as categories and what they can tell us about consciousness In Stinking Philosophy Young presents a methodology for addressing the philosophical and conceptual issues raised by the sense of smell Then in an exacting and coherent fashion he explores how the philosophy of smell contributes to and advances a wide range of debates within philosophy of mind perception and cognitive neuroscience Ultimately his work demonstrates how empirically informed philosophy can have a significant impact on interdisciplinary research on smell across philosophy the chemosciences and neuroscience

The Smell of Slavery Andrew Kettler, 2020-05-28 In the Atlantic World different groups were aromatically classified in opposition to other ethnic gendered and class assemblies due to an economic necessity that needed certain bodies to be defined as excremental which culminated in the creation of a progressive tautology that linked Africa and waste through a conceptual hendiadys born of capitalist licentiousness The African subject was defined as a scented object appropriated as filthy to create levels of ownership through discourse that marked African peoples as unable to access spaces of Western modernity Embodied cultural knowledge was potent enough to alter the biological function of the five senses to create a European olfactory consciousness made to sense the African other as foul Fascinating informative and deeply researched The Smell of Slavery exposes that concerns with pungency within the Western self were emitted outward upon the freshly dug outhouse of the mass slave grave called the Atlantic World
