Social Competence in Developmental Perspective B.H. Schneider, Grazia Attili, Jacqueline Nadel, Roger P. Weissberg, 2012-12-06 What determines the focus of a researcher's interest the sources of inspiration for a study or the variables scrutinized If we were to examine the antecedents of these decisions they would surely emerge as accidents of circumstance the personal experiences of the researcher the inspiration of early mentors the influence of contemporary colleagues all tempered by the intellectual currents that nurture the researcher's hypotheses Among the accidents that mold the careers of researchers is geographic location The culture in which a research program emerges helps determine both its very subject and its method The primary purpose of this book is to assist those interested in the scientific study of children's social competence in transcending the boundaries imposed both by geography and by selective exposure to the highly diverse schools of thought that have led to interest in this field Most of these ideas were presented and exchanged at an Advanced Study Institute entitled Social Competence in Developmental Perspective held in Savoie France in July 1988 This Institute was attended by scholars from France England Northern Ireland Germany Italy Norway Spain Portugal Netherlands Canada the United States and Brazil Those who participated will recognize that the metamorphosis from lecture to chapter has necessitated many changes In order to accommodate the reader who may be unfamiliar with the field more attention has been paid here to identifying the theoretical contexts of the research described *Developing Social Competency in Young Children* Christine A. Schmidt, 2019-07-02 Social competency is a set of skills that provide children with the tools and abilities to successfully navigate the world around them *Developing Social Competency in Young Children* looks at each of the seven Cs of social competence communication community building coping confidence conflict resolution control and curiosity During any given day a child will enter and exit many group situations More often than not children lack the knowledge experience or emotional intelligence to be socially competent in all situations There is not a switch or a specific age when children automatically become socially competent and adults often assume that when children reach a certain age or milestone they will know how to effectively employ the seven Cs of social competency without being taught These skills must be taught and environments need to be designed to encourage the development of these skills while intentionally providing opportunities to test and hone them *Developing Social Competency in Young Children* examines the role of the adult in designing the environment and using intentional strategies to maximize a child's success At the end of each skill discussed there are parent and staff educational tips and strategies that can be used in everyday life **Video Games and Social**

Competence Rachel Kowert, 2014-11-27 Despite their popularity online video games have been met with suspicion by the popular media and academic community In particular there is a growing concern that online video game play may be associated with deficits in social functioning Due to a lack of empirical consistency the debate surrounding the potential impact of online video game play on a user's sociability remains an active one This book contributes to this debate by exploring the potential impact of online video game involvement on social competence outcomes theoretically and empirically Through empirical research Kowert examines the relationships between online video game involvement social goals and social skills and discusses the underlying mechanisms of these effects Group Work Practice to Advance Social

Deaf and Hard-of-Hearing Children Shirin D. Antia, Kathryn H. Kreimeyer, 2015-06-01 Social Competence of Deaf and Hard of Hearing Children addresses the development assessment and promotion of social competence in children who are deaf or hard of hearing DHH Most children readily develop social competence through the mutually dependent development of social skills and social relationships Why then write a book on the social competence of DHH children Hearing loss with its resulting communication challenges has the potential to impede the development of social skills and restrict social relationships In this volume Shirin D Antia and Kathryn H Kreimeyer highlight multiple strategies that teachers families and community members can utilize to promote the social competence of DHH children The authors approach this topic by first describing the development and expression of social competence in infants as well as in preschool and school age hearing and DHH children Socially competent children display a flexible repertoire of social behaviors that are appropriately utilized in varying social situations and which further children's social goals Since social competence develops initially through interactions between infants and their caretakers a primary consideration for children with hearing loss is that the infant and caretaker share a common communication approach to facilitate early interaction As infants become preschool age opportunities for interactions with other children increase and social interactions revolve around play The development of

interactive and of pretend play requires children to communicate with one another to assume roles share fantasies and solve social conflicts DHH children must develop communication skills to participate in interactive play and hearing children may need guidance to successfully engage with DHH peers For school age children the importance of peer acceptance increases DHH children need supportive situations both within and outside of school to interact with peers develop friendships and refine the social behaviors that promote peer acceptance The authors present a variety of practical ways to assess the social competence of DHH children They emphasize the role of assessment in identifying social strengths and needs to establish a basis for any necessary intervention They then present ways to promote social competence with a separate focus on strategies appropriate for young DHH children and for school age DHH children For both age groups the authors address the role of families professionals schools and communities in helping children develop the skills needed to become socially competent individuals This book will be a valuable resource for the parents and families of DHH children for the general and special educators who teach these children and for the researchers who describe development and evaluate the effectiveness of strategies to promote the social competence of DHH children
