restructuring The examples of corporate success since the Second World War such as David Alliance and his Viyella Group exploited government policy access to capital markets and closer relationships with retailers but were ultimately unable to respond effectively to international competition and the challenges of globalisation The chapters in this book were originally published in Business History and Accounting Business and Financial History

Issues and Developments in international Trade Policy International Monetary Fund, 1988-12-15 This paper discusses reviews major issues and developments in the trade area and outlines the problems in the multilateral trading system that governments face as they seek to liberalize trade in the Uruguay Round of trade negotiations The paper s emphasis is on policy developments in the major trading nations as they relate to trade in both industrial and agricultural products The survey also includes a review of trade policies in developing countries and refers to available quantitative evidence on protectionism wherever possible The increased use of nontariff measures reflects in part the fact that most industrial countries have bound a considerable proportion of their tariffs particularly on industrial products at relatively low levels Restrictions are particularly widespread in industries suffering from excess capacity such as steel and where comparative advantage has generally shifted to developing countries The lack of major liberalization in agriculture in the US Canada Free Trade Agreement has led some industrial countries to suggest that the US interest in multilateral negotiations is now primarily in agriculture and in some selected new areas such as telecommunications banking and patent protection
