Kimball, 2003-11-01 As a city of the upper South intimately connected to the northeastern cities the southern slave trade and the Virginia countryside Richmond embodied many of the contradictions of mid nineteenth century America Gregg D Kimball expands the usual scope of urban studies by depicting the Richmond community as a series of dynamic overlapping networks to show how various groups of Richmonders understood themselves and their society Drawing on a wealth of archival material and private letters Kimball elicits new perspectives regarding people s sense of identity Kimball first situates the city and its residents within the larger American culture and Virginia countryside especially noting the influence of plantation society and culture on Richmond s upper classes Kimball then explores four significant groups of Richmonders merchant families the city s largest black church congregation ironworkers and militia volunteers He describes the cultural world in which each group moved and shows how their perceptions were shaped by connections to and travels within larger economic cultural and ethnic spheres Ironically the merchant class s firsthand knowledge of the North confirmed and intensified their southernness while the experience of urban African Americans and workers promoted a more expansive sense of community This insightful work ultimately reveals how Richmonders self perceptions influenced the decisions they made during the sectional crisis the Civil War and Reconstruction showing that people made rational choices about their allegiances based on established beliefs American City Southern Place is an important work of social history that sheds new light on cultural identity and opens a new window on

nineteenth century Richmond
