## **Thai Classical Singing:**

*Thai Classical Singing* Dusadee Swangviboonpong, 2017-07-05 Thai classical singing is a genre that blossomed during the golden age of music in the royal court at Bangkok during the nineteenth century. It took a variety of forms including unaccompanied songs used for narration in plays, instrumental music that was used to accompany mimed actions, and songs of entertainment accompanied by an instrumental ensemble. Today Thai classical singing is found widely outside the court and its influence is evident in many traditional songs. This book is the first in English to provide a detailed study of Thai classical singing. Dusadee Swangviboonpong discusses the historical background to this long established genre, the vocal techniques that it employs, the contexts in which it is performed, the degree of improvisation that performers use, the setting of texts, and the methods used to teach the songs. Teaching methods still tend to focus on oral transmission, although there have been recent attempts by the Thai authorities to standardize the way singing is taught and practised. These controls are argued by the author to be a threat to the variety in style and approach that has characterised this music and kept it alive. The book features transcriptions of Thai classical songs and a glossary of Thai terms, so making it a useful introduction to the genre.

**The Other Classical Musics** Michael Church, 2015. *The Other Classical Musics* offers challenging new perspectives on classical music by presenting the history of fifteen parallel traditions. Winner of the Royal Philharmonic Society Music Award for Creative Communication 2015, there is a treasure trove of underappreciated music out there; this book will convince many to explore it. *The Economist*: What is classical music? This book answers the question in a manner never before attempted by presenting the history of fifteen parallel traditions, of which Western classical music is just one. Each music is analysed in terms of its modes, scales, and theory; its instruments, forms, and aesthetic goals; its historical development, golden age, and condition today; and the conventions governing its performance. The writers are leading ethnomusicologists, and their approach is based on the belief that music is best understood in the context of the culture which gave rise to it. By including Mande and Uzbek, Tajik music plus North American jazz, in addition to the better-known styles of the Middle East, the Indian subcontinent, the Far East, and South East Asia, this book offers challenging new perspectives on the word 'classical'. It shows the extent to which most classical traditions are underpinned by improvisation and reveals the cognate origins of seemingly unrelated musics; it reflects the multifarious ways in which colonialism, migration, and new technology have affected musical development and continue to do today. With specialist language kept to a minimum, it's designed to help both students and general readers to appreciate musical traditions which may be unfamiliar to them and to encounter the reality which lies behind that lazy adjective 'exotic'. MICHAEL CHURCH has spent much of his career in newspapers as a literary and arts editor; since 2010 he has been the music and opera critic of *The Independent*. From 1992 to 2005 he reported on traditional musics all over the world for the BBC World Service. In 2004 Topic Records released a CD of his Kazakh field recordings, and in 2007 two further CDs of his recordings in Georgia and Chechnya. Contributors: Michael Church, Scott DeVeaux, Ivan Hewett, David W. Hughes, Jonathan Katz, Roderic Knight, Frank Kouwenhoven, Robert Labaree, Scott Marcus, Terry E. Miller, Dwight F. Reynolds, Neil Sorrell, Will Sumits, Richard Widdess, Ameneh Youssefzadeh.
