Travis Stork M.D., Leah Furman, 2012-12-11 Young goodlooking ER medic Travis Stork MD was a hit on the US reality TV dating show *The Bachelor*. As a doctor he has found himself listening to countless stories about relationships hearing tales of low self esteem and desperate behaviour. He has now combined his personal and professional expertise to provide a fresh new take on male female dynamics. In *Don't Be That Girl* Travis identifies 8 types of women who tend to make the same mistakes again and again and he offers constructive upbeat advice on how to avoid being That Girl. He cleverly and wittily takes us through all the archetypes: Agenda Girl, Drama Queen Girl, Bitter Girl, Desperate Girl, Yes Girl, Insecure Girl, Lost Girl and Working Girl while encouraging women to defeat their insecurities and learn to feel confident just being themselves. Travis Stork exudes down to earth charm and has an irresistible style of writing that entertains as well as enlightens and is never patronising. Kathleen Wooton, 2010 As a doctor Kathleen Wooton strongly believes that laughter is the best medicine she also believes that the best way for her to administer that medicine is by being a humorist which allows her to give the kind of shot in the arm that so many of us need: a good belly laugh on a daily basis. As a mother Kathy believes that every day she manages to survive motherhood without personal injury or criminal charges is a blessing. *That Girl's Not Right* is a delightful romp through the mind and musings of Kathleen Wooton. Her hilarious commentary provides a unique and often quirky look at what otherwise might be mundane life situations from the entirely relatable *Why Does Water Need a Child Proof Cap* to the all too true *Sleep Deprivation* and the *Exhausted Mom*. *That Girl's Not Right* speaks to all of us through the universal language of laughter. Whether poetry or prose and Wooton offers a healthy dose of each. The homespun humor in this collection is just what the doctor ordered *That Girl of Pierre's* Robert Davis, 2007 Due to massive technological and medical advances in the life sciences: molecular genetics, biology, biochemistry etc modern medicine is increasingly effective in treating individual patients but little technological advancement has focused on advancing the healthcare infrastructure. *Management Engineering for Effective Healthcare Delivery: Principles and Applications* illustrates the power of management engineering for quantitative managerial decision making in healthcare settings. This understanding makes it possible in turn to predict performance and/or real resource requirements allowing decision makers to be truly proactive rather than reactive. The distinct feature of this book is that it provides international exposure to this challenging area **That Girl from Texas**
