That Noble Cabinet History Of British Mu:

That Noble Cabinet Edward Miller,1974 **That Noble Cabinet** Edward Miller,1973 Museums in Motion Edward P. Alexander,Mary Alexander,2008 In 1979 Edward P Alexander s Museums in Motion was hailed as a much needed addition to the museum literature In combining the history of museums since the eighteenth century with a detailed examination of the function of museums and museum workers in modern society it served as an essential resource for those seeking to enter to the museum profession and for established professionals looking for an expanded understanding of their own discipline Now Mary Alexander has produced a newly revised edition of the classic text bringing it the twenty first century with coverage of emerging trends resources and challenges New material also includes a discussion of the children s museum as a distinct type of institution and an exploration of the role computers play in both outreach and traditional in person visits

That Noble Cabinet ,1973 *Exposing Electronics* Bernard Finn,2000-12-21 It is clear that artifacts have the power to provoke thought inspire action and arouse passions There is evidence of this in the ever increasing number of museums as well as in the ability of those museums to stimulate controversy through exhibits As a consequence much has been written analyzing the interaction between objects and museum visitors Less well recognized or understood is the value of objects for historical research In this series of books we propose to show by example how artifacts can be employed in the study of the history of science and technology in ways ranging from motivating a line of research to providing hard evidence in the solution of an otherwise insoluble problem The first volume focused on medicine in this the second volume the topic our authors address is electronics As readers will discover there is considerable scope in the range of topics and in the range of uses of artifacts There is also a section that suggests to readers what kind of questions they might consider when they visit electrical exhibits and where those exhibits are to be found This series is sponsored by the Deutsches Museum in Munich the Science Museum in London and the Smithsonian Institution in Washington with help from professional historians in other museums and elsewhere Keeping Their Marbles Tiffany Jenkins,2018 The story of how the museums of the West acquired their fabulous collections from the Benin Bronzes to Native American sacred objects and why they should not be returned to the lands or the people from which they came *Culture, Education and the State* Michael Stephens,2019-08-13 First published in 1988 this book is built around the trio of interrelated themes of The State Culture and Education The essays look at a variety of institutions including the BBC The British Library and the Arts Council and discuss the educational roles that they adopt and how they set the national cultural agenda They also explor *Joseph Banks and the British Museum* Neil Chambers,2015-09-30 Concentrating on the explorer and naturalist Joseph Banks 1743 1820 this book explores the early history of collections at the British Museum Taking Banks extraordinary career as its basis it examines the changes that took place during a period of transition that led to collecting on an increasingly global scale **Life on Display** Karen A. Rader,Victoria E.M. Cain,2014-10-03 Rich with archival detail and compelling characters Life on Display uses the history of

biological exhibitions to analyze museums shifting roles in twentieth century American science and society Karen A Rader and Victoria E M Cain chronicle profound changes in these exhibitions and the institutions that housed them between 1910 and 1990 ultimately offering new perspectives on the history of museums science and science education Rader and Cain explain why science and natural history museums began to welcome new audiences between the 1900s and the 1920s and chronicle the turmoil that resulted from the introduction of new kinds of biological displays They describe how these displays of life changed dramatically once again in the 1930s and 1940s as museums negotiated changing often conflicting interests of scientists educators and visitors The authors then reveal how museum staffs facing intense public and scientific scrutiny experimented with wildly different definitions of life science and life science education from the 1950s through the 1980s The book concludes with a discussion of the influence that corporate sponsorship and blockbuster economics wielded over science and natural history museums in the century s last decades A vivid entertaining study of the ways science and natural history museums shaped and were shaped by understandings of science and public education in the twentieth century United States *Life on Display* will appeal to historians sociologists and ethnographers of American science and culture as well as museum practitioners and general readers

Victorian Bloomsbury Rosemary Ashton, 2012-09-14 While Bloomsbury is now associated with Virginia Woolf and her early twentieth century circle of writers and artists the neighborhood was originally the undisputed intellectual quarter of nineteenth century London Drawing on a wealth of untapped archival resources Rosemary Ashton brings to life the educational medical and social reformists who lived and worked in Victorian Bloomsbury and who led crusades for education emancipation and health for all Ashton explores the secular impetus behind these reforms and the humanitarian and egalitarian character of nineteenth century Bloomsbury Thackeray and Dickens jostle with less famous characters like Henry Brougham and Mary Ward Embracing the high life of the squares the nonconformity of churches the parades of shops schools hospitals and poor homes this is a major contribution to the history of nineteenth century London

Science in the Enlightenment William E. Burns, 2003-11-17 The first introductory A Z resource on the dynamic achievements in science from the late 1600s to 1820 including the great minds behind the developments and science s new cultural role Though the Enlightenment was a time of amazing scientific change science is an often neglected facet of that time Now *Science in the Enlightenment* redresses the balance by covering all the major scientific developments in the period between Newton s discoveries in the late 1600s to the early 1800s of Michael Faraday and Georges Cuvier Over 200 A Z entries explore a range of disciplines including astronomy and medicine scientists such as Sir Humphry Davy and Benjamin Franklin and instruments such as the telescope and calorimeter Emphasis is placed on the role of women and proper attention is given to the shifts in the worldview brought about by Newtonian physics Antoine Laurent Lavoisier s chemical revolution and universal systems of botanical and zoological classification Moreover the social impact of science is explored as well as the ways in which the work of scientists influenced the thinking of philosophers such as Voltaire and

Denis Diderot and the writers and artists of the romantic movement

Encyclopedia of Library and Information Science

Allen Kent, Harold Lancour, Jay E. Daily, 1977-05-01 The Encyclopedia of Library and Information Science provides an outstanding resource in 33 published volumes with 2 helpful indexes This thorough reference set written by 1300 eminent international experts offers librarians information computer scientists bibliographers documentalists systems analysts and students convenient access to the techniques and tools of both library and information science Impeccably researched cross referenced alphabetized by subject and generously illustrated the Encyclopedia of Library and Information Science integrates the essential theoretical and practical information accumulating in this rapidly growing field *Slaves and Other Objects* Page duBois, 2008-03-15 Page duBois a classicist known for her daring and originality turns in this new book to one of the most troubling subjects in the study of antiquity the indispensability of slaves in ancient Greece DuBois argues that every object and text in the world of ancient Greece bears the marks of slavery and the need to reiterate the distinction between slave and free And yet the ubiquity of slaves in ancient societies has been overlooked by scholars who idealize antiquity misconstrued by those who view slavery through the lens of race and obscured by the split between historical and philological approaches to the classics DuBois begins her study by exploring the material culture of slavery including how most museum exhibits erase the presence of slaves in the classical world Shifting her focus to literature she considers the place of slaves in Plato's Meno Aristotle's Politics Aesop's Fables Aristophanes Wasps and Euripides Orestes She contends throughout that portraying the difference between slave and free as natural was pivotal to Greek concepts of selfhood and political freedom and that scholars who idealize such concepts too often fail to recognize the role that slavery played in their articulation Opening new lines of inquiry into ancient culture *Slaves and Other Objects* will enlighten classicists and historians alike

Weighing the World Russell McCormack, 2011-12-08 The book about John Michell 1724-93 has two parts The first and longest part is biographical an account of Michell's home setting Nottinghamshire in England the clerical world in which he grew up Church of England the university Cambridge where he studied and taught and the scientific activities he made the center of his life The second part is a complete edition of his known letters Half of his letters have not been previously published the other half are brought together in one place for the first time The letters touch on all aspects of his career and because they are in his words they help bring the subject to life His publications were not many a slim book on magnets and magnetism one paper on geology two papers on astronomy and a few brief papers on other topics but they were enough to leave a mark on several sciences He has been called a geologist an astronomer and a physicist which he was though we best remember him as a natural philosopher as one who investigated physical nature broadly His scientific contribution is not easy to summarize Arguably he had the broadest competence of any British natural philosopher of the eighteenth century equally skilled in experiment and observation mathematical theory and instruments his field of inquiry was the universe From the structure of the heavens through the structure of the Earth to the forces of the elementary

particles of matter he carried out original and far reaching researches on the workings of nature Friends of Interpretable Objects Miguel TAMEN, Miguel Tamen, 2009-06-30 Tamen's concern is to show how inanimate objects take on life through their interpretation notably in our own culture as they are collected and housed in museums It is his claim that an object becomes interpretable only in the context of a society of friends Thus he suggests our inveterate tendency as human beings to interpret the phenomenal world gives objects not only a life but also a society *Thinking About Exhibitions* Bruce W. Ferguson, Reesa Greenberg, Sandy Nairne, 2005-08-11 An anthology of writings on exhibition practice from artists critics curators and art historians which address the contradictions posed by museum and gallery staged exhibitions and the challenge of staging art presentations and displays **A Companion to Museum Studies** Sharon Macdonald, 2011-08-24 A Companion to Museum Studies captures the multidisciplinary approach to the study of the development roles and significance of museums in contemporary society Collects first rate original essays by leading figures from a range of disciplines and theoretical stances including anthropology art history history literature sociology cultural studies and museum studies Examines the complexity of the museum from cultural political curatorial historical and representational perspectives Covers traditional subjects such as space display buildings objects and collecting and more contemporary challenges such as visiting commerce community and experimental exhibition forms The British Consular Service in the Aegean and the Collection of Antiquities for the British Museum Lucia Patrizio Gunning, 2016-12-05 The book tells the story of how the British consular service in the Aegean in the years of the British protectorate of the Ionian Islands 1815 1864 became an agency for the retrieval excavation and collection of antiquities eventually destined for the British Museum Exploring the historical political and diplomatic circumstances that allowed the consular service to develop from a chartered company into a state run institution under the direction of the Foreign Office it provides a unique perspective on the intersection of state policy private ambition and the collecting of antiquities Drawing extensively on consular correspondence the study sets out several challenges to current views For those interested in the history of travel in the Levant or more generally in the Grand Tour the book presents an alternative point of view that challenges the travellers descriptions of the region The book also intersects with British diplomatic history providing an insight into the consuls in both their official and private circumstances and comparing their situation under the Levant Company with that of the Foreign Office run consular service The complex political situation in the Aegean at the time of the take over of the service is examined along with the political and commercial roles of the consuls their daily dealings with the Greeks and Ionians and also with the Ottoman authorities Through private correspondence it shows how the consuls reflected the belief that Greek Egyptian Babylonian Roman and other antiquities would be better looked after in a British French German or American museum than by the people and in the countries they were created for In particular the book illuminates the public private nature of the consuls role the way they worked with but independently of government and it reveals how Britain was able to acquire major pieces

of sculpture from the nineteenth century Aegean *Value and the Humanities* Zoe Hope Bulaitis, 2020-06-29 Tracing the shift from liberal to neoliberal education from the nineteenth century to the present day this open access book provides a rich and previously underdeveloped narrative of value in higher education in England *Value and the Humanities* draws upon historical financial and critical debates concerning educational and cultural policy Rather than writing a singular defence of the humanities against economic rationalism Zoe Hope Bulaitis constructs a nuanced map of the intersections of value in the humanities encompassing an exploration of policy engagement scientific discourses fictional representation and the humanities in public life The book articulates a kaleidoscopic range of humanities practices which demonstrate that although recent policy encourages higher education to be entirely motivated by outcomes fiscal targets and the acquisition of employability skills the humanities continue to inspire and aspire beyond these limits This book is a historically grounded and theoretically informed analysis of the value of the humanities within the context of the market **International Dictionary of Library Histories** David H. Stam, 2001-11-01 Following the format of Fitzroy Dearborn's highly successful *International Dictionary of Historic Places* and *International Dictionary of University Histories* the *International Dictionary of Library Histories* provides basic information for each institution location and holdings followed by an extensive 1 000 5 000 word essay on its history as well as a Further Reading list In addition the dictionary includes introductory articles on the history of various types of libraries and a library history in various regions of the world The dictionary profiles more than 200 institutions from around the world including the world's most important research libraries and other libraries with globally or regionally notable collections innovative traditions and significant and interesting histories The essays take advantage of the growing scholarship of library history to provide insightful overviews of each institution including not only the traditional values of these libraries but their innovations as well such as developments in automated systems and electronic delivery The profiles will emphasize the unique materials of research in these institutions archives manuscripts personal and institutional papers The introductory articles on types of libraries include topics ranging from theological libraries to prison libraries from the ancient to the digital An international team of more than 200 leading scholars in the field have contributed essays to the project
