contradictory demands of motherhood and the workplace Pregnancy was grounds for dismissal from work and few employers took action to protect pregnant workers To counter this early twentieth century feminists and reformers emphasized female specificity and women's special role In the 1960s activists adopted a strategy framed on equality which moved away from the earlier emphasis on differences The use of equality strategies to cover the female specific phenomenon of pregnancy turned out to have problems Now women's special needs were denied and ignored These difficulties and a series of court cases in the 1980s triggered debates in the feminist legal community Vogel looks at the litigation and debates which pitted advocates of gender neutral strategies against critics who called for female specific policies Vogel argues that in terms of practical benefits women will be served best by a gender neutral approach to pregnancy policy She encourages equality advocates to recognize the inherent diversity of individuals and points out the need to be sensitive to individual factors of race and class as well as sex
