Thatching and Thatched Buildings Michael Billett,1979 Billett,1988 *Decon Thatch* Jo Cox,John R. L. Thorp,2001 **Thatching and Thatched Buildings** Michael **Energy Efficiency and Historic Buildings** David Pickles,2016-04-29 This guidance provides advice on the principles risks materials and methods for insulating thatched roofs There are estimated to be about fifty thousand thatched buildings in England today some of which retain thatch which is over six hundred years old Thatching reflects strong vernacular traditions all over the country Well maintained thatch is a highly effective weatherproof coating as traditional deep thatched eaves will shed rainwater without the need for any down pipes or gutters Locally grown thatch is a sustainable material which has little impact on the environment throughout its life cycle It requires no chemicals to grow can be harvested by hand or using traditional farm machinery requires no mechanical processing and therefore has low embodied energy and can be fixed using hand tools At the end of its life it can be composted and returned to the land Thatch has a much greater insulating value than any other traditional roof covering With the right choice of material and detailing a well maintained thatched roof will keep a building warm in winter and cool in summer and has the added advantage of being highly sound proof The guidance stresses that changes to improve the energy performance of thatched roofs should only be attempted where really necessary as many thatched buildings already provide adequate thermal performance and where the traditional breathable performance of the building will not be compromised This guidance forms one of a series of thirteen guidance notes covering the thermal upgrading of building elements such as roofs walls and floors *Thatches and Thatching* Marjorie Sanders,Roger Angold,2012 Thatches and Thatching examines the building industry s response to thatching issues and its achievements in bringing the craft of thatching into the twenty first century It shows how it has secured a sustainable and viable future for thatch without compromising tradition
