### **Shaping American Military Capabilities after the Cold War**

Richard Lacquement,2003-02-28 For more than 40 years U S defense policy and the design of military capabilities were driven by the threat to national security posed by the Soviet Union and its allies As the Soviet Union collapsed analysts wondered what effect this dramatic change would have upon defense policy and the military capabilities designed to support it Strangely enough this development would ultimately have little effect on our defense policy Over a decade later American forces are a smaller but similar version of their Cold War predecessors The author argues that despite many suggestions for significant change the bureaucratic inertia of comfortable military elites has dominated the defense policy debate and preserved the status quo with only minor exceptions This inertia raises the danger that American military capabilities will be inadequate for future warfare in the information age In addition such legacy forces are inefficient and inappropriately designed for the demands of frequent and important antiterrorist and peace operations Lacquement offers extensive analysis concerning the defense policymaking process from 1989 to 2001 including in particular the 2001 Quadrennial Defense Review This important study also provides a set of targeted policy recommendations that can help solve the identified problems in preparing for future wars and in better training for peace operations Military Industry and Regional Defense Policy

Timothy D. Hoyt,2017-07-05 Military Industry and Regional Defense Policy re examines military industrialization in the developing world focusing on policy making in producer states and the impact of security perceptions on such policy making Timothy D Hoyt reassesses the role of regional state sub systems in international relations and recent historical studies of international technology and arms transfers Looking at Israel Iraq and India the three most powerful regional powers in the Cold War era he presents an expert analysis of the three sided phenomena of the regional hegemony the regional competitor and the small over achiever This new book breaks away from existing literature on military industries in the developing world which has focused on their economic and development costs and benefits These past studies have used primitive methodologies that focus on the production of complete weapons systems a misleading gauge in a world of growing international defense cooperation They have also ignored empirical evidence of the impact of local military industrial production on Cold War regional conflict and of the defence planning and concerns that drove development of indigenous military industries in key regional powers This new text delivers an incisive new perspective **Concurrent Resolution on**

Japan's Defense Policy and

Bureaucratic Politics, 1976-2007 Takao Sebata, 2010-06-05 It is a well known fact that Japan spends only a small percentage of her gross national product on defense What is not well known however is the fact that Japan s defense budget ranks among the top in the world and that her self defense forces are considered to be amongst the best conventional armed forces in the world Since empirical studies concerning Japan s military expansion are rare both in Japanese and English the book takes up this neglected area It examines Japan s military expansion and the decision making of her defense policy between 1976 and 2007 focusing on the National Defense Program outline and the guidelines for United States Japan Defense Cooperation This book deals with how the bureaucratic politics model applies to the case of Japan s defense policy and demonstrates some similarities and differences between Japanese and United States decision making Winged Shield, Winged Sword: 1950-1997 Bernard C. Nalty, 1997 This is the milestone official comprehensive history of the United States Air Force with compelling stories about America s airmen and their aircraft This document Volume II picks up the narrative at the Korean War takes it through the War in Southeast Asia the Gulf War to the drawdown following the end of the Cold War barnesandnoble com **Energy Abstracts for Policy Analysis** ,1988 *A Republic No More* Jay Cost, 2016-07-12 After the Constitutional Convention Benjamin Franklin was asked Well Doctor what have we got a Republic or a Monarchy Franklin s response A Republic if you can keep it This book argues we couldn t keep it A true republic privileges the common interest above the special interests To do this our Constitution established an elaborate system of checks and balances that disperses power among the branches of government which it places in conflict with one another The Framers believed that this would keep grasping covetous factions from acquiring enough power to dominate government Instead only the people would rule Proper institutional design is essential to this system Each branch must manage responsibly the powers it is granted as well as rebuke the other branches when they go astray This is where subsequent generations have run into trouble we have overloaded our government with more power than it can handle The Constitution s checks and balances have broken down because the institutions created in 1787 cannot exercise responsibly the powers of our sprawling immense twenty first century government The result is the triumph of special interests over the common interest James Madison called this factionalism We know it as political corruption Corruption today is so widespread that our government is not really a republic but rather a special interest democracy Everybody may participate yes but the contours of public policy depend not so much on the common good as on the push and pull of the various interest groups encamped in Washington DC

**Bulletin of the Atomic Scientists** ,1985-04 **The Diplomatic History of Postwar Japan** Makoto Iokibe, Translated and Annotated by Robert D. Eldridge, 2013-10-31 Winner of the prestigious Yoshida Shigeru Prize 1999 for the best book in public history when it was published in its original Japanese this book presents a comprehensive and up to date overview of Japan s international relations from the end of the Pacific War to the present Written by leading Japanese authorities on the subject it makes extensive use of the most recently declassified Japanese documents memoirs and diaries It introduces the

personalities and approaches Japan's postwar leaders and statesmen took in dealing with a rapidly changing world and the challenges they faced. Importantly the book also discusses the evolution of Japan's presence on the international stage and the important if underappreciated role Japan has played. The book examines the many issues which Japan has had to confront in this important period from the occupation authorities in the latter half 1940s to the crisis filled 1970s from the post Cold War decade to the contemporary war on terrorism. The book examines the effect of the changing international climate and domestic scene on Japan's foreign policy and the way its foreign policy has been conducted. It discusses how the aims of Japan's foreign relations and how its relationships with its neighbours allies and other major world powers have developed and assesses how far Japan has succeeded in realising its aims. It concludes by discussing the current state of Japanese foreign policy and likely future developments.
