The Modern Language Of Architecture:

The Modern Language of Architecture Bruno Zevi, 1978 *The Classical Language of Architecture* John Summeron, 1966-12-15 The author's purpose is to set out as simply and vividly as possible the exact grammatical workings of an architectural language Classical architecture is a visual language and like any other language has its own grammatical rules Classical buildings as widely spaced in time as a Roman temple an Italian Renaissance palace and a Regency house all show an awareness of these rules even if they vary them break them or poetically contradict them Sir Christopher Wren described them as the Latin of architecture and the analogy is almost exact There is the difference however that whereas the learning of Latin is a slow and difficult business the language of classical architecture is relatively simple It is still to a great extent the mode of expression of our urban surroundings since classical architecture was the common language of the western world till comparatively recent times Anybody to whom architecture makes a strong appeal has probably already discovered something of its grammar for himself In this book the author's purpose is to set out as simply and vividly as possible the exact grammatical workings of this architectural language He is less concerned with its development in Greece and Rome than with its expansion and use in the centuries since the Renaissance He explains the vigorous discipline of the orders and the scope of rustication the dramatic deviations of the Baroque and in the last chapter the relationship between the classical tradition and the modern architecture of today The book is intended for anybody who cares for architecture but more specifically for students beginning a course in the history of architecture to whom a guide to the classical rules will be an essential companion *Quatremere de Quincy* Sylvia Lavin, 1992 Sylvia Lavin uncovers the origins of one of the fundamental concepts of modern architectural theory the idea that architecture is a form of language The Modern Language Journal , 1928 Includes section Reviews *The Historiography of Modern Architecture* Panayotis Tournikiotis, 2001-02-27 The history of modern architecture as constructed by historians and key texts Writing according to Panayotis Tournikiotis has always exerted a powerful influence on architecture Indeed the study of modern architecture cannot be separated from a fascination with the texts that have tried to explain the idea of a new architecture in a new society During the last forty years the question of the relationship of architecture to its history of buildings to books has been one of the most important themes in debates about the course of modern architecture Tournikiotis argues that the history of modern architecture tends to be written from the present projecting back onto the past our current concerns so that the beginning of the story really functions as a representation of its end In this book the buildings are the quotations while the texts are the structure Tournikiotis focuses on a group of books by major historians of the twentieth century Nikolaus Pevsner Emil Kaufmann Sigfried Giedion Bruno Zevi Leonardo Benevolo Henry Russell Hitchcock Reyner Banham Peter Collins and Manfredo Tafuri In examining these writers thoughts he draws on concepts from critical theory relating architecture to broader historical models The Modern Language Quarterly , 1904 **Announcement** University of
