The Oil Syndrome and Agricultural Development Sara J. Scherr, 1985 *Sustainable Agriculture and the Environment in the Humid Tropics* National Research Council, Board on Science and Technology for International Development, Board on Agriculture, Committee on Sustainable Agriculture and the Environment in the Humid Tropics, 1993-02-01 Rainforests are rapidly being cleared in the humid tropics to keep pace with food demands economic needs and population growth Without proper management these forests and other natural resources will be seriously depleted within the next 50 years Sustainable Agriculture and the Environment in the Humid Tropics provides critically needed direction for developing strategies that both mitigate land degradation deforestation and biological resource losses and help the economic status of tropical countries through promotion of sustainable agricultural practices The book includes A practical discussion of 12 major land use options for boosting food production and enhancing local economies while protecting the natural resource base Recommendations for developing technologies needed for sustainable agriculture A strategy for changing policies that discourage conserving and managing natural resources and biodiversity Detailed reports on agriculture and deforestation in seven tropical countries The Keepers of Water and Earth Kjell I. Enge, Scott Whiteford, 2014-04-15 Agrarian reforms transformed the Mexican countryside in the late twentieth century but without in many cases altering fundamental power relationships This study of the Tehuac n Valley in the state of Puebla highlights different strategies to manipulate the local implementation of federal government programs With their very differing successes in the struggle to regain and maintain control of land and water rights these strategies raise important questions about the meaning of the phrase locally controlled development Because Mexico is dependent on irrigation for 45 percent of its cash crop production national policy has focused on developing vast government controlled and financed irrigation systems In the Tehuac n Valley however the inhabitants have developed a complex irrigation system without government aid or supervision Yet in contrast to most parts of Mexico water rights can be bought and sold as a commodity leading to accumulation stratification and emergence of a regional elite whose power is based on ownership of land and water The analysis provides an important contribution to the understanding of local control The findings of this study will be important to a wide audience involved in the study of irrigation local agricultural systems and the interplay between local power structures and the national government in developing countries The book also presents unique material on gravity fed horizontal wells known as qanat in the Middle East which had been unknown in the literature on Latin America before this book **Boosting Competitiveness Through Decentralization** Aylin Topal, 2016-04-15 Decentralization is accepted as one of the defining features of the third wave of democratic transitions in Latin America and commonly understood as an index and an agent of democratization This rather optimistic perspective is inherent in the literature which is dominated by two theories The liberal individualist approach especially as advocated by the World Bank promotes decentralization policies on the premise of their efficiency equity and

responsiveness to local demands Similarly the statist approach claims that decentralization can be the route to greater accountability transparency and participation in governance they add that this path should be guided by political elites and institutions These dominant views nevertheless understate the extent to which certain decentralization policies have been implemented in lockstep with neoliberalization This book examines the relationship between global economic processes and decentralization It argues that through decentralization policies the imperatives of neoliberal rules of competitiveness have been diffused into local governments and economies generating different local development models Whether decentralization produces democratic opening at the local level is contingent on how the local economy is integrated into global economic processes and which social and economic groups are empowered and disempowered in that transition

Farms Trees and Farmers J. E. Michael Arnold, 2014-05-22 This title aims to provide introductory and concluding surveys of the subject of farms trees and farmers Two central parts explore trends in farmer tree growing and the factors which influence decision making Eight case studies cover among other topics the need for tree products market access the allocation of land and labour and exposure to risk In showing why farmers decide to grow or not grow trees it seeks to increase the reader's knowledge about farming systems and to provide a guide to encouraging farm forestry throughout the world

Constructed Movements Ragini Shah, 2024-12-03 A free ebook version of this title is available through Luminos University of California Press's Open Access publishing program Visit www.luminosoa.org to learn more At once theoretically sophisticated and poignantly written *Constructed Movements* centers stories from communities in Mexico profoundly affected by emigration to the United States to show how migration extracts resources along racial lines Ragini Shah chronicles how three interrelated dynamics the maldistribution of public resources the exploitation of migrant labor and the US immigration enforcement regime entrench the necessity of migration as a strategy for survival in Mexico She also highlights the alternative visions elaborated by migrant community organizations that seek to end the conditions that force migration Recognizing that reform without recompense will never right an unjust migratory system Shah concludes with a forceful call for the US and Mexican governments to make abolitionist investments and reparative compensation to directly counteract this legacy of extraction

Oiling the System Heather Dawn Hanson, 2002 *The Journal of Energy and Development*, 1991 *The Political Economy of Mexican Oil* Laura Randall, 1989-12-08 This work follows upon the author's previous volume *The Political Economy of Venezuelan Oil* and investigates the general workings of the Mexican oil industry in relationship to the economics and politics of Mexico Specifically the author examines Mexico's state-run oil concern PEMEX and the costs and benefits of Mexican oil policy for the nation as a whole and for special groups Using in-depth interviews and extensive data from PEMEX and other sources Randall explores issues such as PEMEX's relationships with workers and the oil union with suppliers of capital goods and services with the regions in which oil is produced and with specific groups of oil consumers Given the critical and negative publicity PEMEX has received over its lifetime Randall also seeks to answer questions

regarding the extent of corruption overstaffing and lax management within PEMEX which she finds to be less than is often alleged Students of energy and development economics will find Randall s study an important contribution to the literature of Latin American economic policy In addition to examining the internal workings of PEMEX Randall describes and analyzes measures taken to correct earlier abuses and to increase efficiency She reveals the intricate relationships among Mexican oil production OPEC the United States and other nations and explores the contradictory aspects of Mexican economic and oil policies that inhibit the ability of the oil industry to reach official goals Throughout Randall traces the transformation of PEMEX from a nationalized industry that mainly produced crude oil for export to one that has expanded to include refined products and petrochemicals As a result of this expansion Randall demonstrates PEMEX has had a major impact both on the market for labor and capital goods and on the regions in which it operates Her conclusions regarding the current and future prospects for PEMEX have important implications for the study of economic and energy development throughout the Third World
