The Origin of Modern Capitalism and Eastern Asia Norman JACOBS (of New York University.), 1958 **The Shorter Science and Civilisation in China: Volume 1** Joseph Needham, Colin A. Ronan, 1978 Volumes I and II of the major series China its language geography and history Chinese philosophy and scientific thought **Max Weber in Asian Studies** Andreas E. Buss, 2022-11-07 *The East in the West* Jack Goody, 1996-03-21 The East in the West reassesses Western views of Asia Traditionally many European historians and theorists have seen the societies of the East as static or backward Jack Goody challenges these assumptions beginning with the notion of a special Western rationality which enabled us and not them to modernise He then turns to book keeping which several social and economic historians have seen as intrinsic to capitalism arguing that there was in fact little difference between East and West in terms of mercantile activity Other factors said to inhibit the East's development such as the family and forms of labour have also been greatly exaggerated This Eurocentrism both fails to explain the current achievements of the East and misunderstands Western history The East in the West starts to redress the balance and so marks a fundamental shift in our view of Western and Eastern history and society *The Oxford Handbook of Asian Business Systems* Michael A. Witt, Gordon Redding, 2014-01-30 Much of the existing literature within the varieties of capitalism VOC and comparative business systems fields of research is heavily focused on Europe Japan and the Anglo Saxon nations As a result the field has yet to produce a detailed empirical picture of the institutional structures of most Asian nations and to explore to what extent existing theory applies to the Asian context The Oxford Handbook of Asian Business Systems aims to address this imbalance by exploring the shape and consequences of institutional variations across the political economies of different societies within Asia Drawing on the deep knowledge of 32 leading experts this book presents an empirical comparative institutional analysis of 13 major Asian business systems between India and Japan To aid comparison each country chapter follows the same consistent outline Complementing the country chapters are eleven contributions examining major themes across the region in comparative perspective and linking the empirical picture to existing theory on these themes A further three chapters provide perspectives on the influence of history and institutional change The concluding chapters spell out the implications of all these chapters for scholars in the field and for business practitioners in Asia The Handbook is a major reference work for scholars researching the causes of success and failure in international business in Asia *The Shorter Science and Civilisation in China: Volume 2* Joseph Needham, Colin A. Ronan, 1978 Volume 2 contains Volume III and a section of Volume IV Part 1 of the major series Mathematics Astronomy Meteorology Geography map making Geology related sciences Physics excluding electricity magnetism **Max Weber** Alan Sica, 2017-09-08 The most profound and enduring social theorist of

sociology's classical period Max Weber speaks as cogently to concerns of the new century as he did to those of the past In Max Weber and the New Century Alan Sica demonstrated Weber's preeminent position and lasting vitality within social theory by applying his ideas to a broad range of topics of contemporary concern Max Weber A Comprehensive Bibliography is a companion volume that offers some 4 600 bibliographic listings of work on Weber making it the most complete guide to the literature in English and a testament to the continued vitality of Weber's thought Sica's work supersedes all previous bibliographical efforts covering the Weber literature both in the quantity and accuracy of its references and the clarity and convenience of its format In order to demonstrate the enormous variety of Weberiana in English Sica has adopted a liberal criterion for inclusion rather than a critical one choosing to mix the best with what may be more routine work Following a preface in which previous bibliographies and bibliographic problems are discussed the volume opens with a series of five specialized bibliographies The first lists Weber's works in English translation The second lists reviews of Weber's major works including those translated into English while the third covers reviews of recent books and other work on Weber The fourth section contains a selection of dissertations and theses relating to Weber or his ideas The fifth includes primary and secondary sources treating Weber on rationality and rationalization processes The last and largest section offers a comprehensive Weber bibliography of works in English This large scale endeavor attempts to identify with accuracy and completeness the entire universe of Weber scholarship in English It will be an essential scholarly tool for sociologists historians economists and students of cultural and intellectual history
