Interim Assessment of the HOPE VI Program

Cross-Site Report Mary Joel Hollin, 2011-11-17 In 1989 Congress established the Nat Comm on Severely Distressed Public Housing to explore the problems of troubled public housing developments and to establish a plan to address those problems by the year 2000 Following several years of research and public hearings the Comm's 1992 final report identified the key factors that defined severely distressed housing extensive physical deterioration of the property a considerable proportion of residents living below the poverty level a high incidence of serious crime and management problems as evidenced by a large number of vacancies high unit turnover and low rent collection rates The Comm members agreed that existing approaches

Century of Difference Claude S. Fischer, Michael Hout, 2006-11-16

In every generation Americans have worried about the solidarity of the nation. Since the days of the Mayflower, those already settled here have wondered how newcomers with different cultures, values, and frequently skin color would influence America. Would the new groups create polarization and disharmony? Thus far, the United States has a remarkable track record of incorporating new people into American society, but acceptance and assimilation have never meant equality. In *Century of Difference*, Claude Fischer and Michael Hout provide a compelling and often surprising new take on the divisions and commonalities among the American public over the tumultuous course of the twentieth century. Using a hundred years worth of census and opinion poll data, *Century of Difference* shows how the social, cultural, and economic fault lines in American life shifted in the last century. It demonstrates how distinctions that once loomed large later dissipated, only to be replaced by new ones. Fischer and Hout find that differences among groups by education, age, and income expanded, while those by gender, region, national origin, and even in some ways race narrowed. As the twentieth century opened, a person's national origin was of paramount importance, with hostilities running high against Africans, Chinese, and southern and eastern Europeans. Today, diverse ancestries are celebrated with parades. More important than ancestry for today's Americans is their level of schooling. Americans with advanced degrees are increasingly putting distance between themselves and the rest of society, in both a literal and a figurative sense. Differences in educational attainment are tied to expanding inequalities in earnings, job quality, and neighborhoods. Still, there is much that ties all Americans together. *Century of Difference* knocks down myths about a growing culture war. Using seventy years of survey data, Fischer and Hout show that Americans did not become more fragmented over values in the late twentieth century, but rather were united over shared ideals of self-reliance, family, and even religion. As public debate has flared up over such matters as immigration restrictions, the role of government in redistributing resources to the poor, and the role of religion in public life, it is important to take stock of the divisions and linkages that have typified the U.S. population over time. *Century of Difference* lucidly profiles the evolution of American social and cultural differences over the last century, examining the shifting importance of education, marital status, race, ancestry, gender, and other factors on the lives of Americans past and present. A Volume in the Russell Sage Foundation Census Series.
