Debus,2012 Illustrated field guide to diurnal raptors a bird group that many people find among the most difficult birds to identify Raptors are popular and iconic birds important ecologically as well as in legislation Also provides a brief overview of the biology of raptors an indication of current state of knowledge on them Publishers' Circular and Booksellers' Record of British and Foreign Literature ,1895 Scientific and Technical Books and Serials in Print ,1984 **Glimpses of Paradise** Penny Olsen,2007 The history of the Paradise Parrot from its discovery in the 1800s to its extinction in the 1920s and how claims of sightings have continued to the present day Report of the Council New South Wales. Library,1901 **The Cockatoos** Edward John Mulawka,2016-04-28 This reference book on the cockatoo family provides a comprehensive physical description of the various species of this exotic parrot the habitat they favor and their distribution and behaviors both in the wild and in captivity Their reproductive history is examined as is the possibility of breeding sufficient numbers in captivity to develop sustainable populations for re introduction to their original habitat should they become extinct in the wild The book explores the historical encounters of the various species with Europeans two centuries ago That early history provides considerable insight to the cockatoo s popularity and to efforts to breed them in captivity Many cockatoo species face a perilous future As their native forests are logged the cockatoos lose not only suitable nesting and roosting sites but native foods Additionally despite conservation laws governing the capture of wild cockatoos their desirability as an avian pet has spawned a worldwide illicit trade critically endangering some species to the point that they face extinction in the wild

Use of Wetland Habitats by Birds in the National Petroleum Reserve--Alaska Dirk V. Derksen,Thomas C. Rothe,William D. Eldridge,1981 Distribution abundance and use of wetland habitats by migratory birds were studied at 2 interior and 3 outer Arctic Coastal Plain sites in the National Petroleum Reserve in Alaska in 1977 and 1978 *The Action Plan for Australian Birds 2010* Stephen Garnett,Judit Szabó,Guy Dutson,Guy C. L. Dutson,2011 The Action Plan for Australian Birds 2010is the third in a series of action plans that have been produced at the start of each decade The book analyzes the International Union for Conservation of Nature IUCN status of all the species and subspecies of Australia s birds including those of the offshore territories For each bird the size and trend in their population and distribution has been analyzed using the latest iteration of IUCN Red List Criteria to determine their risk of extinction The book also provides an account of all those species and subspecies that are or are likely to be extinct Each categorization is justified on the basis of the latest research including much unpublished material that has been made available during workshops conducted with leading ornithologists and conservation biologists around the country as well as phone interviews and correspondence The result is the most authoritative account yet of the status of Australia s birds In this completely revised edition each account covers not only the 2010 status but provides a retrospective assessment of the status in 1990 and 2000 based on current knowledge taxonomic revisions and changes to the IUCN criteria and then reasons why the status of some taxa has changed over the last two decades Maps have been created specifically for the Action Plan based on vetted data drawn from the records of

Birds Australia its members and its partners in many government departments The book contains some surprises some alarming some encouraging The status of some birds has improved over the last two decades as a result of dedicated conservation management Some may not have changed status but at least they are holding their own Many however are continuing to decline and a distressing number are new to the list There is also an increasing number of birds for which captive insurance populations need not only to be considered as a future option but actively pursued before it is too late But this is not a book of lost causes It is a call for action to keep the extraordinary biodiversity we have inherited and pass the legacy to our children Every one of Australia's threatened taxa can be saved This book describes the populations of species at greatest risk and outlines ways we can turn them around

KEY FEATURES Readily accessible status information with reasons for listing Synopsis of principal features that influence listing List of actions needed for conservation Includes specially commissioned distribution maps
