Moon, 2010-06-28 Story is everywhere in human

lives and cultures and it features strongly in the processes of teaching and learning Story can be called narrative case study critical incident life history anecdote scenario illustration or example creative writing storytelling it is a unit of communication it is in the products of the media industries in therapy and in our daily acts of reflecting Stories are told in many ways they are spoken written filmed mimed or acted presented as cartoons and in new media formats and through all these they are associated with both teaching and learning processes but in different ways and at different levels As a result of growing interest and simultaneous confusion about story it is timely to untangle the various meanings of story so that we can draw out and extend its value and use Using Story aims to clarify what we mean by story to seek out where story occurs in education and life and to explore the processes by which we learn from story In this way the book intends to bring story into the open and improve its use Building on her wealth of experience in the field Jenny Moon explores the theory of story and demonstrates both its current uses and new ways in which to enrich and enliven teaching learning and research processes Ideal for anyone involved in education personal or professional development or with a more general interest in story the book begins by considering the range of what is meant by story and then considers the theory behind the meanings In the large final part of the book Jenny provides a rich patchwork of different uses of story in education that cut across forms of story story activities disciplines and applications all of which will aid the use of story

Succeeding King Lear
Emily Sun, 2010 This book investigates the question of the relations between literature and politics in democratic modernity It makes connections between Shakespeare's tragedy Wordsworth's poetry and the documentary nonfiction and photography of James Agee and Walker Evans to offer new ways of thinking of the logic of literary history and the relationship between early modern Romantic and twentieth century texts and it brings literature into dialogue with contemporary philosophical readings of Western political thought King Lear Sun argues opens up a literary succession at the heart of which is a crisis of sovereignty Interrogating what it is to be a political subject as actor and spectator in the kingdom the play issues an injunction to transform spectatorship in plural and nonsovereign terms Thorough engagements with Lear Wordsworth in the 1790s and Agee and Evans in the 1930s assume this injunction by generating new artistic genres and modes for their times

The electrifying forgotten history of Robert Heath s brain pacemaker investigating the origins and ethics of one of today s most promising medical breakthroughs deep brain stimulation The technology invented by psychiatrist Robert G Heath in the 1950s and 60s has been described as among the most controversial experiments in US history His work was alleged at the time to be part of MKUltra the CIA s notorious mind control project His research subjects included incarcerated convicts and gay men who wished to be cured of their sexual preference Yet his cutting edge research and legacy were quickly buried deep in Tulane University s archives Investigative science journalist Lone Frank now tells the complete story of this passionate determined doctor and his groundbreaking neuroscience More than fifty years after Heath s

experiments this very same treatment is becoming mainstream practice in modern psychiatry for everything from schizophrenia anorexia and compulsive behavior to depression Parkinson s and even substance addiction Lone Frank uncovered lost documents and accounts of Heath s trailblazing work She tracked down surviving colleagues and patients and she delved into the current support for deep brain stimulation by scientists and patients alike What has changed Why do we today unquestioningly embrace this technology as a cure How do we decide what is a disease of the brain to be cured and what should be allowed to remain unrobed and unprodded And how do we weigh the decades of criticism against the promise of treatment that could be offered to millions of patients Elegantly written and deeply fascinating The Pleasure Shock weaves together biography scientific history and medical ethics It is an adventure into our ever shifting views of the mind and the fateful power we wield when we tinker with the self
