Terrier socialization Training Nutrition Grooming Genetic health concerns common to Boston Terriers Caring for an aging Boston Terrier Generally considered a fantastic dog for first time dog families the Boston Terrier has an incredibly friendly personality that makes him a great addition to any home Socialization is fairly easy because the breed is naturally friendly Training may be a bit more difficult particularly housetraining so do be prepared to put in a lot of extra patience and some extra time to get your puppy to the point where accidents become a thing of the past They adore their people though some are prone to choosing one favorite person and it will be obvious as they will become like a shadow to their favorite person This is also a breed that has a wide range of personalities with some being bouncy and fun while others are more dignified and mellow What most of them have in common though is how much they enjoy spending time with the people in their lives They are also easy to integrate into a home with other dogs and even cats as long as the cat doesn't totally object to your new dog The biggest drawback to the breed is their numerous genetic health issues Part of the issues stem from the fact that the Boston Terrier has a short nose which increases the number of issues with their large eyes and hampers their ability to breathe as easily as dogs with longer snouts They are also prone to both allergies and stomach sensitivities so you will need to be careful about what you feed your dog and how much the environment affects your pup Most of the ailments are not life threatening they have a life expectancy between 13 and 15 years They are also incredibly easy to groom with their short haired coats
