The Old Bridge:

Media and The City Chiara Giaccardi, Matteo Tarantino, Simone Tosoni, 2014-07-18 The percentage of people living in cities and the adoption rates of communication technologies continue to grow across the planet Our age has come to be defined as one of urbanism and communication but how are those two intertwined How do they shape each other Where and in which ways do they diverge support or fold into each other As new tensions emerge and old ones find new solutions social sciences are forced into a dialogue with media studies and urban studies in order to make sense of the new reality New theoretical and methodological paradigms are urgently needed and can be produced only through a fertile and eclectic dialogue This volume presents some of the latest research in this exciting cross disciplinary field Issues of conflict mobility crime art memory ethnicity identity and city marketing and branding come under rigorous scrutiny in their mutual and constitutive relationship with urban space and communicative technologies and practices The volume is divided into three broad sections The first section deals with the role of media in the social production of urban space that is with how media interact with other forces in giving shape to the materiality of the city The second section deals with how urban space acts as a context for a variety of media related practices especially in relation to the popularization of mobile geo localization technologies which have given us mass phenomena such as Foursquare The third and final section deals with how urban space is mediated and communicated through ICTs or in other terms how urban space is represented by specific media through specific discursive strategies

The Enquiring Classroom Stephen Rowland, 2012 This book by closely recording and reflecting upon the work and play of a group of 9 to 11 year old children in a primary classroom develops an approach to teaching and learning which is based upon the ways in which children are able to exercise a controlling influence over their own learning activity It also suggests the sharing and analysis of classroom experience should be part of a teacher's day to day life The material for the book was gathered during a year of classroom enquiry in which the author combined the roles of teacher and researcher working alongside the normal class teacher in a primary school Samples of the children's work are carefully described and analysed in an attempt to get behind the overt behaviour of the children and reveal the purposes concerns and thinking that underlies their activity

Military Necessity in International Cultural Heritage Law Berenika

Drazewska,2021-12-13 This book offers the first comprehensive scholarly analysis of the current meaning and scope of military necessity a key concept in the international legal framework for the protection of cultural heritage during armed conflicts since the adoption of the 1954 Hague Convention Academic discussions commonly view military necessity uniquely through the lens of international humanitarian or international criminal law In her book Berenika Drazewska presents a more comprehensive perspective examining developments across various strands of international law arisen since 1954 This novel approach demonstrates how international cultural heritage law affords a particularly strict meaning to military necessity As a result the relative waiver will only be available to belligerents very rarely in truly extraordinary circumstances Drazewska s *Military Necessity in International Cultural Heritage Law* engages a significant issue in this rapidly evolving field of international law the inclusion of necessity in regulation of the protection of cultural heritage during armed conflict after 1945 Its very inclusion was viewed as a major concession which is only multiplied because of the difficulties of its application on the ground This thorny issue has come to the fore again with large scale cultural losses inflicted during recent armed conflicts Elegantly written and scholarly in its approach this book places this question and possible answers to it within the broader sweep of international law and recent developments not only in international humanitarian law but state responsibility international criminal law and international criminal law It offers a significant and timely reexamination and reconceptualization of this important topic Prof Ana Filipa Vrdoljak UNESCO Chair in International Law Cultural Heritage Faculty of Law University of Technology Sydney The Code of Federal Regulations of the United States of America ,1988 The Code of Federal Regulations is the codification of the general and permanent rules published in the Federal Register by the executive departments and agencies of the Federal Government *Movement as Conflict Transformation* Susan Forde,2018-07-21 This book presents narratives of the social use of space in the divided city of Mostar Bosnia Herzegovina Through the narratives of movement in the city the work demonstrates how residents engage informally with conflict transformation through new movement and use of spaces This book will appeal across the social sciences and in particular to students academics and researchers in the fields of peace and conflict studies political sociology and human geography
