The Old New Logic Essays On The Philosophy Of Fred Sommers:

The Old New Logic David S. Oderberg, 2005 A diverse group of contributors reflect on the philosophical legacy of Fred Sommers and his efforts to revive and refashion traditional Aristotelian logic for a post Fregean world Analytic Philosophy and the Return of Hegelian Thought Paul Redding, 2007-09-13 This 2007 book examines the possibilities for the rehabilitation of Hegelian thought within analytic philosophy From its inception the analytic tradition has in general accepted Bertrand Russell's hostile dismissal of the idealists based on the claim that their metaphysical views were irretrievably corrupted by the faulty logic that informed them These assumptions are challenged by the work of such analytic philosophers as John McDowell and Robert Brandom who while contributing to core areas of the analytic movement nevertheless have found in Hegel sophisticated ideas that are able to address problems which still haunt the analytic tradition after a hundred years Paul Redding traces the consequences of the displacement of the logic presupposed by Kant and Hegel by modern post Fregean logic and examines the developments within twentieth century analytic philosophy which have made possible an analytic re engagement with a previously dismissed philosophical tradition **Exploring Topics in the History and Philosophy of Logic** George Englebretsen, 2015-09-14 While post Fregean logicians tend to ignore or even denigrate the traditional logic of Aristotle and the Scholastics new work in recent years has shown the viability of a renewed extended and strengthened logic of terms that shares fundamental features of the old syllogistic A number of logicians following the lead of Fred Sommers have built just such a term logic It is a system of formal logic that not only matches the expressive and inferential powers of today's standard logic but surpasses it and is far simpler and more natural This book aims to substantiate this claim by exhibiting just how the term logic can shed need light on a variety of challenges that face any system of formal logic Research in History and Philosophy of Mathematics Maria Zack, Dirk Schlimm, 2020-01-02 This volume contains ten papers that have been collected by the Canadian Society for History and Philosophy of Mathematics Soci t  canadienne d'histoire et de philosophie des math matiques It showcases rigorously reviewed contemporary scholarship on an interesting variety of topics in the history and philosophy of mathematics from the seventeenth century to the modern era The volume begins with an exposition of the life and work of Professor Boleslaw Sobociński It then moves on to cover a collection of topics about twentieth century philosophy of mathematics including Fred Sommers's creation of Traditional Formal Logic and Alexander Grothendieck's work as a starting point for discussing analogies between commutative algebra and algebraic geometry Continuing the focus on the philosophy of mathematics the next selections discuss the mathematization of biology and address the study of numerical cognition The volume then moves to discussing various aspects of mathematics education including Charles Davies's early book on the teaching of mathematics and the use of Gaussian Lemniscates in the classroom A collection of papers on the history of mathematics in the nineteenth century closes out the volume presenting a discussion of Gauss's Allgemeine Theorie des Erdmagnetismus and a comparison of the

geometric works of Desargues and La Hire Written by leading scholars in the field these papers are accessible not only to mathematicians and students of the history and philosophy of mathematics but also to anyone with a general interest in mathematics

Dictionary Of Modern American Philosophers John R. Shook, 2005-05-15 The Dictionary of Modern American Philosophers includes both academic and non academic philosophers and a large number of female and minority thinkers whose work has been neglected It includes those intellectuals involved in the development of psychology pedagogy sociology anthropology education theology political science and several other fields before these disciplines came to be considered distinct from philosophy in the late nineteenth century Each entry contains a short biography of the writer an exposition and analysis of his or her doctrines and ideas a bibliography of writings and suggestions for further reading While all the major post Civil War philosophers are present the most valuable feature of this dictionary is its coverage of a huge range of less well known writers including hundreds of presently obscure thinkers In many cases the Dictionary of Modern American Philosophers offers the first scholarly treatment of the life and work of certain writers This book will be an indispensable reference work for scholars working on almost any aspect of modern American thought

Deductive Systems in Traditional and Modern Logic Alex Citkin, Urszula Wybraniec-Skardowska, 2020-11-18 The book provides a contemporary view on different aspects of the deductive systems in various types of logics including term logics propositional logics logics of refutation non Fregean logics higher order logics and arithmetic

Figuring It Out George Englebretsen, 2019-11-18 Many systems of logic diagrams have been offered both historically and more recently Each of them has clear limitations An original alternative system is offered here It is simpler more natural and more expressively and inferentially powerful It can be used to analyze not only syllogisms but arguments involving relational terms and unanalyzed statement terms

Personal Identity Ellen Frankel Paul, Fred Dycus Miller, Jeffrey Paul, 2005 What is a person What makes me the same person today that I was yesterday or will be tomorrow Philosophers have long pondered these questions In Plato's Symposium Socrates observed that all of us are constantly undergoing change we experience physical changes to our bodies as well as changes in our manners customs opinions desires pleasures pains and fears Aristotle theorized that there must be some underlying substratum that remains the same even as we undergo these changes John Locke rejected Aristotle's view and reformulated the problem of personal identity in his own way is a person a physical organism that persists through time or is a person identified by the persistence of psychological states by memory These essays written by prominent philosophers and legal and economic theorists offer valuable insights into the nature of personal identity and its implications for morality and public policy

Real Essentialism David S. Oderberg, 2007-11-13 Real Essentialism presents a comprehensive defence of neo Aristotelian essentialism Do objects have essences Must they be the kinds of things they are in spite of the changes they undergo Can we know what things are really like can we define and classify reality Many if not most philosophers doubt this influenced by centuries of empiricism and by the anti essentialism of Wittgenstein Quine Popper

and other thinkers Real Essentialism reinvigorates the tradition of realist essentialist metaphysics defending the reality and knowability of essence the possibility of objective immutable definition and its relevance to contemporary scientific and metaphysical issues such as whether essence transcends physics and chemistry the essence of life the nature of biological species and the nature of the person Ontology, Modality, and Mind Alexander Carruth, Sophie Gibb, John Heil, 2018-10-04

This book explores a range of traditional and contemporary metaphysical themes that figure in the writings of E J Lowe whose powerful and influential work was still developing at the time of his death in 2015 During his forty year career he established himself as one of the world s leading philosophers publishing eleven single authored books and well over two hundred essays His scholarship was strikingly broad ranging from early modern philosophy to the interpretation of quantum mechanics His most important and sustained contributions were to philosophy of mind philosophical logic and above all metaphysics E J Lowe was committed to a systematic realist and scientifically informed neo Aristotelean approach to philosophy This volume presents a set of new essays by philosophers who share this commitment addressing interrelated themes of his work In particular these papers focus upon three closely connected topics central not only to Lowe s work but to contemporary metaphysics and philosophy of mind in general ontology and categories of being essence and modality and the metaphysics of mental causation
