Challenging the One Best System Katrina E. Bulkley, Julie A. Marsh, Katharine O. Strunk, Douglas N. Harris, Ayesha K. Hashim, 2021-02-04 In *Challenging the One Best System* a team of leading education scholars offers a rich

comparative analysis of the set of urban education governance reforms collectively known as the portfolio management model. They investigate the degree to which this model, a system of schools operating under different types of governance and with different degrees of autonomy, challenges the standard structure of district governance famously characterized by David Tyack as the one best system. The authors examine the design and enactment of the portfolio management model in three major cities: New Orleans, Los Angeles, and Denver. They identify the five interlocking mechanisms at the core of the model: planning and oversight, choice, autonomy, human capital, and school supports, and show how these are implemented differently in each city. Using rich qualitative data from extensive interviews, the authors trace the internal tensions and tradeoffs that characterize these systems and highlight the influence of historical and contextual factors as well. Most importantly, they question whether the portfolio management model represents a fundamental restructuring of education governance or more incremental change, and whether it points in the direction of meaningful improvement in school practices. Drawing on a rigorous multimethod study, *Challenging the One Best System* represents a significant contribution to our understanding of system-level change in education.

Encyclopedia of American Urban History David Goldfield, 2007 Publisher description: Urban Education in the 19th Century D.A. Reeder, 2018-01-02 First published in 1977 *Urban Education in the 19th Century* is a collection based on the conference papers of the annual 1976 conference for the History of Education Society. The book illustrates a variety of ways of elucidating the connections between education and the city, mainly in nineteenth-century Britain. Essays cover political, geographical, demographic, and socio-structural aspects of urbanization. There is an emphasis on comparative studies of urban educational developments, and attention is paid to the perceptions of the nineteenth-century city and its problems, especially for child life, as well as to the realities of urban change.

Education and the City Gerald Grace, 2013-06-17 City schools, especially those attended by working-class and ethnic minority pupils, are the catalysts of many significant issues in educational debate and policy making. They bring into sharp focus questions to do with class, gender, and race relations in education; concepts of equality of opportunity and of social justice; and controversies about the wider political, economic, and social context of mass schooling. America, Western Europe, and Australia have all taken a keen interest in the problems of urban schooling. The contributors to this collection of original essays all share a concern about these problems, although they approach them from a wide range of theoretical and ideological positions. Gerald Grace and his contributors criticize the current limitations of urban education as a field of study, and they present a foundation for a more historically located and critically informed inquiry into problems, conflicts, and contradictions in urban schooling. Part I presents contributions on theories of the urban; Part II focuses upon the history of urban education, both in Britain and the USA; Part III discusses contemporary policy and practice, with essays relating to education in inner-city London and in New York City. This book was first published in 1984.

Education Reform in Florida Kathryn M. Borman, Sherman Dorn, 2012-02-01 In *Education Reform in Florida*, sociologists and historians evaluate Governor Jeb Bush's nation-leading

school reform policies since 1999 They examine the startlingly broad range of education policy changes enacted in Florida during Bush s first term including moves toward privatization with a voucher system more government control of public education institutions with centralized accountability mechanisms and a superboard for all public education The contributors arrive at a mixed conclusion regarding Bush s first term education policies while he deserves credit for holding students to higher standards his policies have unfortunately pushed for equality in a very narrow way The contributors remain skeptical about seeing significant and sweeping improvement in how well Florida schools work for all students
