The Other Extreme

Michael Inwood

The Other Extreme:

A Treatise on Elementary and Higher Algebra Theodore Strong, 1859 *Hegel: The Phenomenology of Spirit* Michael Inwood, 2018-02-15 G W F Hegel's first masterpiece the *Phenomenology of Spirit* is one of the great works of philosophy. It remains however one of the most challenging and mysterious books ever written. Michael Inwood presents this central work to the modern reader in an intelligible and accurate new translation. This translation attempts to convey as accurately as possible the subtle nuances of the original German text. Inwood also provides a detailed commentary that explains what Hegel is saying at each stage of his argument and also discusses the philosophical issues it raises. This volume will therefore prove invaluable to those who want to get to grips with Hegel's thought processes and to follow his complex argument.

Local and Regional Economic Development: Renegotiating Power Under Labour Robert J. Bennett, Diane Payne, 2019-07-15 This title was first published in 2000. Since New Labour were elected in 1997 there have been substantial changes made to local and regional economic development policy in the UK. This volume offers an up to date overview setting the new policies within a wider historic context and suggesting future developments. It examines four of these new policies in depth: Regional Development Agencies, New Deal local partnerships, Local Learning and Skills Councils and the Small Business Service and Business link. In doing so it offers a critical appraisal of how effective these changes have been in tackling issues such as developing human resources, skills and opportunities, developing land infrastructure and sites, capital formation and development, encouraging innovation, entrepreneurship and technological change and enhancing a supportive institutional context.

An Examination of the Place of Reason in Ethics Stephen Edelston Toulmin, **Edinburgh Medical Journal**, 1904 **The National Arithmetic**, Benjamin Greenleaf, 1859 **A Philosophical Introduction to Human Rights** Thomas Mertens, 2020-09-24 While almost everyone has heard of human rights, few will have reflected in depth on what human rights are, where they originate from and what they mean. *A Philosophical Introduction to Human Rights* accessibly written without being superficial, addresses these questions and provides a multifaceted introduction to legal philosophy. The point of departure is the famous 1948 Universal Declaration of Human Rights, which provides a frame for engagement with western legal philosophy. Thomas Mertens sketches the philosophical and historical background of the Declaration, discusses the ten most important human rights with the help of key philosophers and ends by reflecting on the relationship between rights and duties. The basso continuo of the book is a particular world view derived from Immanuel Kant. Unsocial sociability is what characterises humans, i.e. the tension between man's individual and social nature. Some human rights emphasize the first, others the second aspect. The tension between these two aspects plays a fundamental role in how human rights are interpreted and applied.
