Dagher,2014-08-20 Prompted by the ongoing debate among science educators over nature of science and its importance in school and university curricula this book is a clarion call for a broad re conceptualizing of nature of science in science education The authors draw on the family resemblance approach popularized by Wittgenstein defining science as a cognitive epistemic and social institutional system whose heterogeneous characteristics and influences should be more thoroughly reflected in science education They seek wherever possible to clarify their developing thesis with visual tools that illustrate how their ideas can be practically applied in science education The volume s holistic representation of science which includes the aims and values knowledge practices techniques and methodological rules as well as science s social and institutional contexts mirrors its core aim to synthesize perspectives from the fields of philosophy of science and science education The authors believe that this more integrated conception of nature of science in science education is both innovative and beneficial They discuss in detail the implications for curriculum content pedagogy and learning outcomes deploy numerous real life examples and detail the links between their ideas and curriculum policy more generally Utopian Literature and Science Patrick Parrinder,2015-08-11 Scientific progress is usually seen as a precondition of modern utopias but science and utopia are frequently at odds Ranging from Galileo s observations with the telescope to current ideas of the post human and the human animal boundary this study brings a fresh perspective to the paradoxes of utopian thinking since Plato **Hands-On Science, Level 6** Jennifer Lawson,2000 This teacher resource offers a detailed introduction to the Hands On Science program which includes its guiding principles implementation guidelines an overview of the science skills that grade 6 students use and develop and a classroom assessment plan complete with record keeping templates The guide has four instructional units Unit 1 Diversity of Living Things Unit 2 Flight Unit 3 Electricity Unit 4 The Solar System Each unit is divided into lessons that focus on specific curricular outcomes Each lesson has materials lists activity descriptions questioning techniques activity centre and extension ideas assessment suggestions activity sheets and visuals
