The Circum-Baltic Languages Östen Dahl, Maria Koptjevskaja-Tamm, 2001-01-01 The area around the Baltic Sea has for millennia been a meeting place for people of different origins Among the circum Baltic languages we find three major branches of Indo European Baltic Germanic and Slavic the Baltic Finnic languages from the Uralic phylum and several others The circum Baltic area is an ideal place to study areal and contact phenomena in languages The present set of two volumes look at the circum Baltic languages from a typological areal and historical perspective trying to relate the intricate patterns of similarities and dissimilarities to the societal background In Volume I surveys of dialect areas and language groups bear witness to the immense linguistic diversity in the area with special attention to less well known languages and language varieties and their contacts

The Land of the Midnight Sun Paul Belloni Du Chaillu, 1888 *The NEBI Yearbook 2000* Lars Hedegaard, Bjarne Lindström, 2012-12-06 The NEBI Yearbook 2000 aims to provide a balanced picture of both the integrationist opportunities and disintegrationist pressures in the North European and Baltic Sea area a region with over 50 million inhabitants and great economic and trading potentials It brings together a wide range of scientific methods and perspectives in addition to a comprehensive statistical section with information found nowhere else The result is a unique source of up to date knowledge of this increasingly important European region

GFF, 1911 *Shuffling Nags, Lamé Ducks* Laszlo Bartosiewicz, Erika Gal, 2013-11-01 The analysis of animal bone assemblages from archaeological sites provides much valuable data concerning economic and husbandry practices in the past as well as insights into cultural and symbolic or ritual activity Animal palaeopathology can identify diseases in archaeozoological assemblages but little interest has been expressed in investigating and understanding the cultural aspects of the diseases identified Such assemblages represent the cumulative effects of human attitudes decisions and influences regarding the keeping care treatment neglect and exploitation of animals which result in a range of conditions non infectious diseases and injuries that can be recognised on ancient skeletal material Additionally ever since the domestication of a handful of animal species around 10 000 years ago close physical proximity has been a mutual source of infectious disease and traumatic injury for humans and animals alike *Shuffling Nags Lamé Ducks* provides an invaluable guide to the investigation of trauma and disease in archaeozoological

assemblages It provides a clear methodological approach and describes and explains the wide range of traumatic lesions infections diseases inherited disorders and other pathological changes and anomalies that can be identified In so doing it explores the impact that man made decisions have had on animals including special aspects of culture that may be reflected in the treatment of diseased or injured animals often incorporating powerful symbolic or religious roles and seeks to enhance our understanding of the relationship between man and beast in the past Chapters include History of studying pathological animal remains Differences between human and animal palaeopathology Methodology Growth development and ageing Traumatic lesions Inflammatory diseases and bone Pathological lesions in working animals Diseases connected to the environment *The Nature of Cultural Heritage, and the Culture of Natural Heritage* David Lowenthal, Kenneth

Olwig, 2013-10-18 The idea that the heritage of nature is fundamentally cultural is provocative to many but it is becoming increasingly accepted in the context of heritage preservation It is argued here that a person's perspective on natural vs cultural heritage as a contested patrimony is to some extent governed by one's intellectual and geographical position In discourses influenced by the natural sciences culture is a heritage of nature whereas in those deriving from the humanities and social sciences nature is defined socio culturally There is also however a geographical dimension to how one looks at the nature culture relation From at least the time of Aristotle the North has been identified with a cultural heritage thought to derive from the northern natural environment It was no longer culture as represented by the architectural monuments of the South but the natural landscape that provided the measure for both natural and cultural heritage as the natural landscape and its ecosystems were put in focus This essay provides a contemporary picture of the long standing contestation between natural and cultural heritage that provided the basis for the northern perspective taken in these essays This book was previously published as a special issue of The International Journal of Heritage Studies Russia's Foreign Trade and

Economic Expansion in the Seventeenth Century J. T. Kotilaine, 2005-01-01 This work is the first comprehensive assessment of Russia's foreign trade flows and economic growth in the seventeenth century By demonstrating the growing openness of the economy it reveals a key element in Russia's rise to great power status **The Västgöta Laws** Thomas

Lindkvist, 2021-07-18 The V stg ta Laws contains the translation of the oldest of the Swedish provincial law codes and other texts of great relevance to the legal history The first version the Older V stg ta Law is from the first half of the thirteenth century and the earliest example of an indigenous vernacular literacy with the Latin script from Sweden A second and highly revised version of the law is preserved in a manuscript from the middle of the fourteenth century This volume also contains a translation of the annotations and proposals made during the complicated negotiations between representatives of the church the kingdom and the community of the province Together the two versions of the law and the annotations offer a unique possibility to understand the making and transformation of a medieval law The importance of the regional leaders the lawmen is evident from the earliest example of history writing in Sweden illustrating the legal and political history of V sterg

land With an Introduction that places the province of V sterg tland and its law into its political setting this translation is invaluable for all students and scholars of medieval Swedish legal and political history **The Beginnings of English Overseas Enterprise** Sir Charles Prestwood Lucas,1917 *Roman Reflections* Klavs Randsborg,2015-01-29 Roman Reflections uses a series of detailed and deeply researched case studies to explore how Roman society connected with and influenced Northern Europe during the Iron and Viking Ages In an original way the book brings late prehistoric Denmark best known for its so called bog bodies into a world dominated by textual histories principally that of Tacitus The studies include a new examination of the bog bodies of the late first millennium BC a classical archaeological puzzle men women and children murdered yet respected in death and adorned with items of fine clothing A second essay challenges traditionally held ideas about the Cimbri by exploring the textual and archaeological evidence including the startling and famous European artefact the Gundestrup silver cauldron The other studies comprise an archaeologically founded modernist discussion of the ethnography of Tacitus Germania in particular considering the character of ancient Germanic Bronze and Iron Age societies a linguistic exploration of the Latin inheritance in northern European names and places much of which seems to have been invented by the Romans and an analysis of the origins of the Danes Throughout traditional sources and history are presented in conjunction with new archaeological observations and interpretations In an accessible way Roman Reflections assesses Denmark s part on a larger stage showing how foundations were laid for its zenith in Viking times
