Sketch For A World Picture A Study Of Evolution:

Sketch for a World-picture John Vyvyan,1972 **Sylvia Plath** David Holbrook,2014-01-13 Admirers of the work of Sylvia Plath will welcome this new paperback edition of a study first published by The Athlone Press in 1976 which provides coherent and persuasive readings of her poetry Drawing upon the traditional skills of the literary critic David Holbrook also deploys the illumination of both psychoanalysis and phenomenology in a pioneering work of literary individual and cultural interpretation Powerful Pictures: Rock Art Research Histories around the World Jamie Hampson,Sam Challis,Joachim Goldhahn,2022-12-29 Focusing on stunning paintings and engravings from around the world 16 papers interrogate the driving forces behind global rock art research Many of the motifs featured were created by indigenous hunter gatherer groups this book sheds new light on non Western rituals and worldviews many of which are threatened or on the point of extinction **The Aryan Path** Sophia Wadia,1975 Aryan Path ,1975 **New Scientist** ,1972 Drawing and industrial art Duluth Public Schools (Duluth, Minn.),1919 **Studies in Religious Imagination and Symbolism** Albert D'Souza,2005-01-01 **Drawing multimodality's bigger picture: Metalanguages and corpora for multimodal analyses** Janina Wildfeuer,Claudia Lehmann,2024-07-30 Multimodality has most recently been described no longer as a research field or discipline on its own but rather as a stage of development within a field Bateman 2022a 49 The realization that 1 many different fields and disciplines now enter their own multimodal phase with new interest in multimodal phenomena and that 2 these disciplines all commit to the development of multimodality research with their own theoretical principles and methodological tools brings with it not only an immense breadth of potential analytical objects but also many new meta methodological issues We need to find ways of combining insights from the variously imported theoretical and methodological backgrounds brought along by previous non multimodal stages of any contributing disciplines Bateman 2022a 49 At the same time the search for a meta methodology for multimodal analyses is pushed further by the recent trend towards more empirical approaches to multimodal phenomena and the development and use of larger multimodal corpora that just as well require theoretical and methodological refinements We need to develop ways of strengthening claims with robustly applicable methods which nevertheless remain firmly anchored theoretically Bateman 2022b 64 For a productive handling of these issues disciplinary triangulation and finding a common language or metalanguage Maton newest results from data collection methods and multimodal corpus analyses that expand the current quantitative work by e g applying existing theories and methods to larger datasets or exploring the newest communication technologies We are particularly interested in seeing how works addressing these aspects contribute to finding ways of productive triangulation and integration for and within a meta methodology for multimodality research This Research Topic aims to bring together scholars from a variety of disciplines interested in multimodality research to review explore and advance the contributions that John Bateman as one of the key figures in multimodality research has made to both theory and method building as well

as to the driving forward of multimodal empirical and corpus analyses We welcome contributions that for example critically address the theoretical and methodological advancements that John Bateman has made with regard to the notions of semiotic mode discourse semantics genre textuality etc apply one of the many approaches that John Bateman has developed for the empirical analysis of multimodal artefacts e g the GeM model for page based documents his work on multimodal film and audio visual analysis and the discourse semantics and or annotation approach to visual narratives to larger corpora or currently newly developing communicative situations expand on one of the abovementioned aspects with new ideas and insights from disciplines that have not yet been included in multimodality research

New Images of Thought in the Study of Childhood Drawing Laura Trafi-Prats, Christopher M. Schulte, 2022-10-21 This book provides a revitalised account of the study of children s drawing by outlining a departure from existing approaches privileging developmentalist accounts and presenting drawing as a specialised human endeavour separated from other material entanglements constituting children s everyday experiences The book takes on current developments in the fields of early childhood arts and early childhood literacies to advocate for process oriented new materialist and decolonial approaches that re conceptualise the study of children s drawing It proposes a future oriented approach centred on thinking experimentally with a focus on nonrepresentational elements such as movement sensation intensity rhythm story and place which singularly assemble in drawing events Thus the book discusses drawing as a process of sense making that is not enclosed in the individualised body of the child and that unfolds corporeally in time and space It revises the relation of drawing with symbolisation by suggesting that the use of language and signs in drawing form in entanglement with matter and sensation in processes of creative speculation connected with the movement of thought Presenting a series of contributions by internationally recognised scholars and artists the book aims to create synergies between theory and practice that speak of everyday realities interconnecting children learning and sense making

The Evolution of Space in Russian Literature Katharina Hansen Löve, 2023-07-31 This book is concerned with the literary development of the narrative category of space in Russian literature from Romanticism until Modernism It consists of two parts The theoretical introduction renders a survey of some major 20 th century theories on literary development in the tradition of Russian Formalism and Czech Structuralism A critical discussion is given of the cultural and stylistic typologies of the soviet scholar D Lichacev and the semiotician I Smirnov Furthermore the ideas on literary space as they were developed by two important representatives of the Moscow Tartu School of Semiotics Ju Lotman and V Toporov are described together with the method of literary analysis they offer The contents of the second part of the book are analyses of the structure of space in the following narrative works Mcyri by M Ju Lermontov Nevskij prospekt by N V Gogol Oblomov by I A Goncarov V tolpe by F Sologub and Kotlovani by A Platonov The analyses are accompanied by an interpretation of the story based on the spatial details in the text It appears that both continuity and change characterize the development of literary space This two fold nature of the evolutionary proces comes to the fore

through recurrence of spatial archetypes in all the periods under discussion and through ambivalence of meaning as a result of the semiotization of literary space in each literary work

Midland Schools, 1897 **Drawing for Science Education** Phyllis Katz, 2017-03-23 This book argues for the essential use of drawing as a tool for science teaching and learning The authors are working in schools universities and continual science learning CSL settings around the world They have written of their experiences using a variety of prompts to encourage people to take pen to paper and draw their thinking sometimes direct observation and in other instances their memories The result is a collection of research and essays that offer theory techniques outcomes and models for the reader Young children have provided evidence of the perceptions that they have accumulated from families and the media before they reach classrooms Secondary students describe their ideas of chemistry and physics Teacher educators use drawings to consider the progress of their undergraduates understanding of science teaching and even their moral ethical responses to teaching about climate change Museum visitors have drawn their understanding of the physics of how exhibit sounds are transmitted A physician explains how the history of drawing has been a critical tool to medical education and doctor patient communications Each chapter contains samples insights and where applicable analysis techniques The chapters in this book should be helpful to researchers and teachers alike across the teaching and learning continuum The sections are divided by the kinds of activities for which drawing has historically been used in science education An instance of observation Audubon Linnaeus A process how plants grow over time what happens when chemicals combine Conceptions of what science is and who does it Images of identity development in science teaching and learning
