Small Dose Of Toxicology:

A Small Dose of Toxicology Steven G. Gilbert, 2004-02-18 Everyday we come into contact with many relatively harmless substances that could at certain concentrations be toxic This applies not only to obvious candidates such as asbestos lead and gasoline but also to compounds such as caffeine and headache tablets While the field of toxicology has numerous texts devoted to aspects of biology chemis *Are "Low Dose" Health Effects of Chemicals Real?* , **Toxicologic Pathology** Page R. Bouchard, Pritam S. Sahota, Shannon Wallace, Zbigniew W. Wojcinski, Vanessa L. Schumacher, 2025-06-23 The new edition provides practical and timely information for toxicologic pathologists working in drug discovery and development The introductory concept chapters are consolidated into two more concise and better organized introductory chapters The two concept chapters introduce the reader to pharmaceutical R D the role of the pathologist in the process and critical partner scientific disciplines with whom the pathologist will collaborate In this revision the organ system chapters incorporate more consistent commentary and guidance on the molecular mechanism of action human translational relevance and regulatory impact of pathological findings as they are described in these chapters Key Features Aids scientists in understanding spontaneously occurring and compound related pathological findings Features three new well respected scientists on the editorial team Includes more consistent commentary and guidance in the organ system chapters *A Comprehensive Guide to Toxicology in Nonclinical Drug Development* Ali S. Faqi, 2024-02-11 Selected for 2025 Doody's Core Titles in Toxicology A Comprehensive Guide to Toxicology in Nonclinical Drug Development Third Edition is a valuable reference providing a complete understanding of all aspects of nonclinical toxicology in pharmaceutical research This updated edition has been expanded and re developed covering a wide range of toxicological issues in small molecules and biologics Topics include ADME in drug discovery pharmacokinetics toxicokinetics formulations and genetic toxicology testing The book has been thoroughly updated throughout to reflect the latest scientific advances and includes new information on antiviral drugs anti diabetic drugs immunotherapy and a discussion on post pandemic drug development challenges and opportunities This is an essential and practical resource for all toxicologists involved in nonclinical testing in industry academic and regulatory settings Provides updated unique content not covered in one comprehensive resource including chapters on stem cells antiviral drugs anti diabetic drugs and immunotherapy Includes the latest international guidelines for nonclinical toxicology in both small and large molecules Incorporates practical examples in order to illustrate day to day activities and expectations associated with working in nonclinical toxicology *Low Dose Exposures in the Environment* C. Streffer, H. Bolt, D. Follesdal, P. Hall, J.G. Hengstler, P. Jacob, D Oughton, K. Prieß, E. Rehbinder, E. Swaton, 2013-11-11 The ever increasing release of harmful agents due to human activities have led in some areas of the world to heavy pollution In order to protect human health and the environment environmental standards that shall limit the release and the concentration of those toxic agents in the environment and hence the exposure to it have to be established The related assessment and decision making

procedures have to be based on solid scientific data about the effects and mechanisms of these agents as well as on ethical social and economic aspects For risk evaluation the knowledge of the dose response curve is an essential prerequisite Dose responses without a threshold dose are most critical in this connection Such dose responses are assumed for mutagenic and carcinogenic effects which therefore dominate also the discussion in this book In the environmentally important low dose range risk estimation can only be achieved by extrapolation from higher doses with measurable effects The extrapolation is accompanied with uncertainties which makes risk evaluation as well as risk communication frequently problematic In order to ensure rational efficient and fair decisions beyond a sound scientific assessment the dialogue between disciplines with the affected people and with the general public is necessary In this book the whole range of relevant and essential aspects of risk evaluation and standard setting is addressed Starting with the ethical foundations the sound analysis of recent scientific findings sets the frame for further reflections by theory of cognition psychosocial sciences and jurisprudence The authors end up with concluding recommendations for coping with the recent problems of standard setting in the field of environmentally relevant low doses The book is designed to a readership of scientists legislators administrators and the interested public

Powerless Science? Soraya Boudia, Nathalie Jas, 2014-01-01 In spite of decades of research on toxicants along with the growing role of scientific expertise in public policy and the unprecedented rise in the number of national and international institutions dealing with environmental health issues problems surrounding contaminants and their effects on health have never appeared so important sometimes to the point of appearing insurmountable This calls for a reconsideration of the roles of scientific knowledge and expertise in the definition and management of toxic issues which this book seeks to do It looks at complex historical social and political dynamics made up of public controversies environmental and health crises economic interests and political responses and demonstrates how and to what extent scientific knowledge about toxicants has been caught between scientific economic and political imperatives
