Sino-Latin American Economic Relations He Li, 1991-11-30 In recent years economic relations between Latin American countries and the People's Republic of China have developed steadily exhibiting marked tendencies toward greater diversification Using newly released data from the Chinese Government along with extensive interviews in China and Latin America Li gives us the first systematic analysis of the economic and political ideas underlying this surge in Sino Latin American economic relations His focus on China's relations with six major trading partners Brazil Argentina Cuba Chile Mexico and Peru provides an accurate assessment of trends and prospects for an emerging bilateral economic partnership The conclusions of this study find that Sino Latin American ties have become less ideological and present PRC involvement has been largely compatible with Western interests Since China is expected to develop into a major economic player in Latin America in the years to come it is important for the United States to understand the implications of these burgeoning relations This study is a valuable and much needed contribution to the literature of South South cooperation and collective self reliance Li examines three main areas of Sino Latin American economic relations trade aid and investment Beginning with the Communist Revolution in China he traces the history of China's relations with the six Latin countries moving through early developments the post Cuban Revolution era the 1970s normalization period and China's Open Door policy Future prospects are considered in the concluding chapters with hopes for greater economic interactions depending on the outcomes of China's own economic reforms and Latin America's economic recession This book will be of interest to those who practice in the sphere of world political economic relations as well as academics who study them *Sino-Latin*

America and the Andean region Individual case studies draw out these themes This volume is a welcome addition to the growing body of literature on China Latin America relations It illuminates the complex interplay between economics and politics that has characterized China's relations with the region as a second decade of enhanced economic engagement draws to a close This volume is an indispensable read for students scholars and policy makers wishing to gain new insights into the political economy of China Latin America relations China and Latin America in Transition Shoujun Cui,Manuel Pérez García,2016-08-27 This volume explores the policy dynamics economic commitments and social impacts of the fast evolving Sino LAC relations China's engagement with Latin America and the Caribbean has entered into an era of strategic transition While China is committed to strengthening its economic and political ties with Latin America and the Caribbean Latin America as a bloc is enthusiastically echoing China's endeavor by diverting their focus toward the other side of the ocean The transitional aspect of China LAC ties is phenomenal and is manifested not only in the accelerating momentum of trade investment and loan but also in the China CELAC Forum mechanism that maps out an institutional framework for decades beyond While Latin America is redefined as an emerging priority to the leadership in Beijing what are the responses from Latin America and the United States In this sense experts from four continents provide local answers to this global question *Latin America Facing China* Alex E. Fernández Jilberto,Barbara Hogenboom,2010-10-01 The last quarter of the twentieth century was a period of economic crises increasing indebtedness as well as financial instability for Latin America and most other developing countries in contrast China showed amazingly high growth rates during this time and has since become the third largest economy in the world Based on several case studies this volume assesses how China's rise one of the most important recent changes in the global economy is affecting Latin America's national politics political economy and regional and international relations Several Latin American countries benefit from China's economic growth and China's new role in international politics has been helpful to many leftist governments efforts in Latin America to end the Washington Consensus The contributors to this thought provoking volume examine these and the other causes effects and prospects of Latin America's experiences with China's global expansion from a South South perspective *China in Latin America: Political and Economic Implications of Beijing's Involvement in the Region* Niccolo Locatelli,2011-02-15 Relations with Latin America have never been and will probably never be a priority for the People's Republic of China PRC as they will be a dependent variable of domestic economic needs and other more important foreign policy goals among all the ties with the United States During the first forty years of existence geopolitical and economic considerations Latin America was considered to be Washington's backyard and the economies of the region were not complementary with that of China were keeping the PRC away from the area nevertheless things have changed ever since the end of the Cold War and more so since the new millenium The PRC finds in Latin America a market of 500 million people and an almost infinite source of commodities it currently gets from here around 17% of its overall agricultural products imports and 11% of its fuel and

mining ones It is a big buyer of three of the four Latin American commodities soy copper and oil and it s increasing its purchases of the fourth coffee The region is also a valuable partner in the struggle for a new world order more democratic and more concerned with the stakes of the developing countries it is a 33 wide voting block whose consensus is useful whenever the human rights policy of the PRC comes under the scrutiny of the United Nations or any of its agencies Finally Latin America is a pawn in the battle for the sovereignty over Taiwan since 12 of the 23 countries that recognize the Republic of China ROC are in the area mainly in Central America and the Caribbean plus Paraguay alone in South America For Latin America the PRC is a huge 1 3 billion people market and a potential source of much needed Foreign Direct Investment which in actuality turns out to be smaller than expected and mostly concentrated in the fiscal heavens of the Caribbean Politically besides the partnership in the struggle for a new world order the mere existence of a China option is itself a source of leverage when Latin American countries have to deal with the United States who now have to face a competitor on trade and politic issues in what used to be their backyard Apparently deepening ties with Latin America is a winning solution for the PRC The same is not completely true for Latin America whose relationship with Beijing can be beneficial but with some caveats As far as bilateral trade is concerned the problem is that of export concentration in 2006 62 5% of the region s exports to China were in the commodity sector it was just 35% in 1995 This leaves Latin America especially South America exposed to the price volatility of its resources which is historically more elevated than that of the manufactured goods and breeds macroeconomic uncertainty in a region that has always struggled with that issue Furthermore export concentration in the commodity sector as far as the terms of trade are favorable as in the years before the ongoing global crisis might hinder the upgrading of the industrial structure of those countries who find in it an easy and quick source of revenues A positive effect on the welfare of the people and the fight against poverty and inequality is not automatically related to the blossoming of exports of natural resources but depends on economic policy choices A more recent less studied aspect of Sino Latin American trade is the increasing penetration of Chinese manufactured goods in the domestic markets of the region while initially outplacating foreign competitors the flow is becoming a source of concern for businesses in the textile sector of countries like Argentina Brazil and Mexico who find it hard to compete with the minimum cost of labor that makes Chinese goods so cheap That explains why the region has tariffs on imports from the Middle Kingdom that are 10% above world average 20% in the case of South America Competition with Chinese manufactures in the third markets is also Central America s main problem in its re

Re-mapping the Americas W. Andy Knight, Julián Castro-Rea, 2016-04-01 Since the end of the Second World War the map of the Americas has changed dramatically Not only were many former European colonies turned into sovereign states there was also an ongoing process of region making recognizable throughout the hemisphere and obvious through the establishment of several regional agreements The emergence of political and economic regional integration blocs is a very timely topic analyzed by scholars in many disciplines worldwide This book looks at

remapping the recent trends in region making throughout the Americas in a way that hasn't been at the center of academic analyses so far. While examining these regionalisation tendencies with a historical background in mind, the authors also answer fundamental questions such as: What influences does globalization have on region making, both on normative regionalism plans as well as on actual economic, political, cultural, military and social regionalization processes driven by state and non-state actors? What ideas or interests lead states in the Americas to cooperate or compete with one another and how is this power distributed? How do these regional agreements affect trade relations and have there been trade barriers set up to protect national economies? What agreements exist or have existed and how did they change with regard to contents and for what reason? The book informs academic as well as non-academic audiences about regional developments in the Americas in particular those dating back to the last twenty years. Beyond the primary purpose of summarizing the hemisphere's recent trends, the book also brings clarification in a detailed but easy-to-understand way about timely issues regarding the institutionalisation or lack thereof of the plethora of regional and sub-regional bodies that have emerged in this hemisphere over the past couple of decades.

Dragonomics Carol Wise, 2020-03-24. An insightful examination of the political and economic ties between China and Latin America from the 1950s to the present. This book explores the impact of Chinese growth on Latin America since the early 2000s. Roughly twenty years ago, Chinese entrepreneurs headed to the Western Hemisphere in search of profits and commodities specifically those that China lacked and that some Latin American countries held in abundance: copper, iron ore, crude oil, soybeans and fish meal. Focusing largely on Argentina, Brazil, Chile, Costa Rica, Mexico and Peru, Carol Wise traces the evolution of political and economic ties between China and these countries and analyzes how success has varied by sector, project and country. She also assesses the costs and benefits of Latin America's recent pivot toward Asia. Wise argues that while opportunities for closer economic integration with China are seemingly infinite, so are the risks and contends that the best outcomes have stemmed from endeavors where the rule of law, regulatory oversight and a clear strategy exist on the Latin American side.

How China is Reshaping the Global Economy Rhys Jenkins, 2022-06-16 China's growing economic involvement in Sub Saharan Africa and Latin America has been a source of major controversy The official Chinese position maintains that the growth of bilateral relations is of mutual benefit and provides a good example of South South cooperation Critics on the other hand see the economic relations between China and other developing countries as highly unequal with most of the benefits accruing to China and a few local elites They also point to negative socio economic political and environmental consequences How China is Reshaping the Global Economy Development Impacts in Africa and Latin America throws more light on these controversies through a comparative study of China's impact on the two regions It looks not just at bilateral relations between China and the two regions but also analyses the changes in the global economy brought about as a result of the shift in economic activity from North America and Western Europe to Asia This book looks at the factors which led to rapid economic growth in China and the way in which this has affected global manufacturing commodity markets the international presence of Chinese companies and financial flows It examines the different forms of Chinese economic involvement in Sub Saharan Africa and Latin America the main drivers and economic social political and environmental consequences It ends with a comparison of the two regions that highlights the importance of different histories and political and institutional contexts in determining the impacts of China Since the first edition of How China is Reshaping the Global Economy Development Impacts in Africa and Latin America China's role in the global economy has continued to expand and the Chinese government's foreign policy has become more assertive The global presence of China has been marked by the expansion of the Belt and Road Initiative to almost 150 countries and the trade war between the US and China as well as increased Western concerns over the activities of major Chinese companies such as Huawei This new edition documents these changes and their implications for SSA and LAC
